Ranskalaisten autojen harrastajaperheen tytär Suomesta muuttaa työn perässä Pariisiin. Siitä alkaa kiehtova tarina erään Citroen ZX:n vaiheista. Pariisin taivaan alta takaisin Suomeen. The daughter of a French car enthusiast from Finland changes to work in Paris. It begins with a story about the stages of Citroen ZX. From Paris under back to Finland.

Confessions of a Car Tragic BoD - Books on Demand

Launched in 1955 yet looking like a sci-fi design proposal for a future then undreamed of, Flaminio Bertoni's ellipsoid sculpture with wheels that was the Citroën DS stunned the world. There was a near riot at the 1955 Paris Motor Show launch of the car, orders flooded in for this, the new 'big Citroën' (a Voiture a Grande Diffusion or VGD) as the car that replaced the legendary Traction Avant range. The term 'DS' stems from two Citroën parts of nomenclature - the type of engine used as the 11D, (D) and the special hemispherical design of the cylinder head as 'Culasse Special' (S): DS out of 'Deesse' or Goddess, was a more popular myth of 'DS' origination, but an erroneous one. But it was not just the car's aerodynamically advanced body shape (Cd. 0.37) that framed the genius of the DS: hydro pneumatic self-levelling suspension, advanced plastics and synthetics for the construction of the roof and dashboard/fascia, and amazing road holding and cabin comfort were some of this car's highlights. Only the lack of an advanced new engine was deemed a missed opportunity. In fact Citroën had created a new engine for the car but lacked the resources to produce it in time for 1955. DS was a major moment in the history of car design, one so advanced that it would take other auto manufacturers years to embrace. Yet DS in its 'aero' design was the precursor to today's low drag cars of curved form. Manufactured worldwide, used by presidents, leaders, diplomats, farmers and many types of people, the DS redefined Citroën, its engineering and design language, and its brand, for decades to come. Prone to rust, not the safest car in the world, and always lacking a smoother powerplant, the DS still became an icon of car

design. Reshaped with a new nose and faired-in headlamps in 1967, DS remained in production until 1975. Across its life DS spawned an estate car variant as the 'Safari', a range of limousines, two-door convertibles, and even coach-built coupes and rally specials. This car was a product design that became an article of social science - it was that famous and it defined a European design movement upon a global stage then packed with 'me too' copyist designs. The DS or 'Goddess' as it was tagged, was a tear-drop shaped act of French confidence in a world of the regurgitation of the known. Some argue that DS and its effect has never been surpassed. This new value-for-money book provides innovative access to the design, history, and modeling of the revolutionary DS - one of the true 'greats' of motoring history and, a contemporary classic car of huge popularity.

Scottish Field Ashgate Publishing, Ltd.

The book starts with an historical overview of road vehicles. The first part deals with the forces exchanged between the vehicle and the road and the vehicle and the air with the aim of supplying the physical facts and the relevant mathematical models about the forces which dominate the dynamics of the vehicle. The second part deals with the dynamic behaviour of the vehicle in normal driving conditions with some extensions towards conditions encountered in high-speed racing driving. Contents: Short Historical Notes on Motor Vehicles Forces Acting between Road and Wheel Road Vehicle Aerodynamics Longitudinal Dynamics Handling of a Rigid Vehicle Motor Vehicle on Elastic Suspensions Road Accidents Readership: Mechanical engineers. keywords: Motor Vehicle Dynamics; Motor Vehicle Handling; Motor Vehicle Comfort; Motor Vehicle Stability; Motor Vehicle Simulation; Motor Vehicle Aerodynamics; Motor Vehicle Suspensions; Tires; Road Accidents; Vehicle-Driver Interaction "... the author provides an interesting and comprehensive treatment of a very complicated subject ... it would be a good addition to the bookshelf of any engineer with an interest in vehicle dynamics or general automotive technology." Applied Mechanics Reviews

In this new view of the Citroen story, automotive/aviation writer and design specialist Lance Cole investigates not just the details of the cars of Citroen, but the aeronautical and cultural origins that lay behind Citroen's form and function. The book digs deep into the ethos of Automobiles Citroen to create a narrative on one of the greatest car manufacturers in history. Using interviews, translations, archive documents and specially-commissioned photographs, the Citroen journey is cast in a fresh perspective. It explains in detail the influences upon Citroen design: Voisin, Lefebvre, Bertoni, Boulanger, Mages, Opron and recent Citroen designers such as Coco, Blakeslee and Soubirou. As well as all the men of the great period of 1920s-1970s expansion, it also cites less well-known names of Citroen's French engineering, design, and influence such as Cayla, Gerin, Giret, Harmand, Dargent and others, to give a full picture of Citroen heritage. The book provides in-depth analysis of all major Citroen models with an engineering and design focus and profiles key individuals and cars up to the present day and Citroen's 'DS'-branded resurgence. It features many newly commissioned photographs, rare archive drawings and interviews with Citroen owners. Researched amongst leading Citroen experts and restorers, Lance Cole provides a fresh perspective on the Citroen car manufacturer, its design language and the legacy of its extraordinary engineering which will be of great interest to all Citroen and motoring enthusiasts. Superbly illustrated with 329 colour photographs, many newly commissioned along with rare archive drawings.

When Chief Inspector Pel accepts a drinks invitation at the house of a big shot, Deputy Claude Barclay, he doesn't realise how compromised he will become by his acceptance. Shortly afterwards, Barclay is kidnapped; the partially decomposed body of a retired soldier is discovered in a wood, and a series of art forgeries need investigating. Pel must tie all three together and solve a scandal which has become the talk of France. Moody, sharp-tongued and worrying constantly about his health, Inspector Pel ensures that no case goes unsolved, in these mordantly witty French mysteries. Praise for the Inspector Pel Mystery series: 'Totally convincing.' Financial Times 'Mr Hebden has created a nice band of flics.' Oxford Times 'Pel and his procedurals are some of the best things since Maigret.' Observer 'Chief Inspector Evariste Clovis Désiré Pel, as well rounded a character as Maigret or Van der Valk.' Punch 'Impeccable French ambience, unexaggerated flics, and a well-constructed solution. Hebden proves again that few understand Gallic cops better than English writers!' The Times 'Some characters grow as their saga lengthens and Pel... is one of them. You might say he is ripening along with the grapes.' Police Review '...written with downbeat humour and some delightful dialogue.' Financial Times '...all is most cunningly contrived and dovetailed into a coherent plot.' Irish Times 'A thoroughly entertaining read.' Evening Standard 'The best Gallic sleuth since Maigret.' London Mystery Selection **The Economist** Grada Publishing a.s.

Nothing is new under the sun and classic cars books come and go. But here, instead of a heavy, large, glossy book of classic car images and details destined to stay on a shelf, is something new. This book is designed to be read as a companion, a book that can go in the car or on a 'plane, and which can be read in full, or dipped into anywhere for a classic car fix. Old stories and new details are presented and cover all eras of our cars. Gathered here is a compilation of the author's published and unpublished adventures and opinions about the design and the driving of some of the greatest cars in motoring history. From 'vintagent' to 'modern classic', pristine to oily-rag, up hill, down dale and across

continents, award-winning motoring author, designer and serial classic car owner, Lance Cole, charts the great classic car enthusiasm in a series of engaging essays about cars, car design and the men that made the motor industry. From tales of Malcolm Sayer to Bedelia, and of BMW, Jaguar, Bugatti and Porsche, to tales of old Saabs and rusty Citroens, classic car life is here. Erik Carlsson, Jacques Gerin, Giovanni Michelotti and Innes Ireland are just a few of the names that can be found in these pages. From design to driving, here is a book that is a classic car adventure.

Uhuru PediaPress

Een selectie van teksten van architect Kas Oosterhuis waarin hij zijn beweegredenen uiteenzet rond de digitale revolutie, die hij vanaf het begin van de 90-er jaren, in zijn ontwerppraktijk inzet. Penguin Books

This textbook draws on the authors' experience gained by teaching courses for engineering students on e.g. vehicle mechanics, vehicle system design, and chassis design; and on their practical experience as engineering designers for vehicle and chassis components at a major automotive company. The book is primarily intended for students of automotive engineering, but also for all technicians and designers working in this field. Other enthusiastic engineers will also find it to be a useful technical guide. The present volume (The Automotive Chassis - Volume 2: System Design) focuses on the automotive chassis as a system, providing readers with the knowledge needed to integrate the individual components described in Volume 1 in a complex system that satisfies customers' expectations. Special emphasis is given to factors influencing system performance, including: - the influence of the powertrain on vehicle performance. Conventional, hybrid and electric powertrains are considered; - factors influencing vehicles' handling performance; - factors influencing vehicles' comfort performance; and - factors influencing vehicles' stability and strategies for accident avoidance (active safety). In addition, this second volume thoroughly covers topics that are usually neglected in other books about the automotive chassis, such as: - the basics of vehicle aerodynamics; - internal combustion engines, electric motors and batteries; and - mathematical modeling tools. This thoroughly revised second edition has been updated to reflect the latest advances in electric and hybrid vehicles, electronic control systems and autonomous driving.

From the sensational Chevrolet Corvette to the stream-lined Toyota Celica, here is the ultimate history of classic cars manufactured since 1975, plus those dream and futuristic cars that were marvels of car design but never made it into production. This comprehensive visual reference shows every important marque from A-Z, highlighting some of the most significant and beautiful cars of the century. Detailed descriptions, history and technical information accompany every entry, making this the most authoritative and comprehensive guide to the contemporary classic car. This book also highlights the world's dream cars that were built as showcases but were never actually mass-produced. From major design houses such as Bertone and Ghia, these cars are at the very cutting edge of car design: futuristic models that were deemed too daring, too brash or too expensive to make commercial sense, but which pay tribute to the imagination and drive of car designers today. With over 800 stunning images, this title is the definitive gallery of classic and dream cars and the decisive reference book for every enthusiast and lover of the automobile.
