The award-winning, highly acclaimed *Artificial Hells* is the first

historical and theoretical overview of socially engaged participatory art, known in the US as "social practice." In recent decades, the art gallery and the museum have become a place for participatory art, where an audience is encouraged to take part in the artwork. This has been heralded as a revolutionary practise that can promote new emancipatory social relations. What was it is really? In this fully updated edition, Claire Bishop follows the trajectory of twentieth-century art and examines key moments in the development of a participatory aesthetic. This itinerary takes in Futurism and Dada; the Situationist International; Happenings in Eastern Europe, Argentina and Paris; the 1970s Community Arts Movement; and the Artists Placement Group. It concludes with a discussion of long-term educational projects by contemporary artists such as Thomas Hirschhorn, Tania Bruguera, Pawel Althamer and Paul Chan. Bishop challenges the political and aesthetic ambitions of participatory art this practise. She not only scrutinizes the emancipatory claims, but also provides an alternative to the ethical (rather than artistic) criteria invited by such artworks. In response Artificial Hells calls for a less prescriptive approach to art and politics, and for more compelling, troubling and bolder forms of participatory art and criticism.

The Death of Expertise David C Cook

Taking Power analyzes the causes behind some three dozen revolutions in the Third World between 1910 and the present. It advances a new theory that seeks to integrate the political, economic, and cultural factors that brought these revolutions about. It attempts to explain why so few revolutions have succeeded, while so many have failed. The book is divided into

chapters that treat particular sets of revolutions and it closes with speculation about the future of revolutions in an age of globalization.

Edward Curtis was charismatic, handsome, a passionate mountaineer, and a famous photographer, the Annie Leibovitz of his time. He moved in rarefied circles, a friend to presidents, vaudevill stars, leading thinkers. And he was thirty-two years old in 1900 when he gave it all up to pursue his Great Idea: to capture on film the continent's original inhabitants before the old ways disappeared.

Winner of the 2012 Helen Bernstein Book Award for Excellence in Journalism Hundreds of companies have slashed pensions and

health coverage for millions of retirees, claiming that a "perfect storm" of stock market losses, aging workers, and spiraling costs have forced them to take drastic measures. But this so-called retirement crisis is no accident. Ellen E. Schultz, an award-winning investigative reporter formerly of The Wall Street Journal, reveals how large employers and the retirement industry have all played a huge and hidden role in the death spiral of American pensions and benefits. A little over a decade ago, pension plans were fat. But companies used slick accounting and dubious loopholes to turn their pension plans into piggy banks, tax shelters, and profit centers. As pensions weakened, companies slashed benefits for workers while doling out gargantuan pensions to their top executives. Drawing on original analysis of company data, government filings, and confidential memos, Schultz uncovers decades of widespread deception during which employers exaggerated their retiree burdens while tricking employees, misleading shareholders, and lobbying for taxpayer handouts.

Technology and increasing levels of education have exposed people to more information than ever before. These societal gains, however, have also helped fuel a surge in narcissistic and misguided intellectual egalitarianism that has crippled informed debates on any number of issues. Today, everyone knows everything: with only a quick trip through WebMD or Wikipedia, average citizens believe themselves to be on an equal intellectual footing with doctors and diplomats. All voices, even the most ridiculous, demand to be taken with equal seriousness, and any claim to the contrary is dismissed as undemocratic elitism. Tom

Nichols' *The Death of Expertise* shows how this rejection of experts has occurred: the openness of the internet, the emergence of a customer satisfaction model in higher education, and the transformation of the news industry into a 24-hour entertainment machine, among other reasons. Paradoxically, the increasingly democratic dissemination of information, rather than producing an educated public, has instead created an army of ill-informed and angry citizens who denounce intellectual achievement. When ordinary citizens believe that no one knows more than anyone else, democratic institutions themselves are in danger of falling either to populism or to technocracy or, in the worst case, a combination of both. An update to the 2017 breakout hit, the paperback edition of *The Death of Expertise* provides a new foreword to cover the alarming exacerbation of these trends in the aftermath of Donald Trump's election. Judging from events on the ground since it first published, *The Death of Expertise* issues a warning about the stability and survival of modern democracy in the Information Age that is even more important today.

"Dare to Inspire shows how to spark and sustain exponential growth." --Shawn Achor, New York Times bestselling author of *Big Potential* and *The Happiness Advantage* Inspiration is a most critical resource to be managed in modern work. The problem is that the power of inspiration often feels fleeting. But what if you could design your own way to be inspired at work on a regular basis? What if you could make your own inspiration last? Rooted in 18 engines of inspiration that emerged from interviews with leaders across different industries, *Dare to Inspire* shows how to

supercharge inspiration for yourself, your team, and your organization. Each chapter offers tools, strategies, and examples of how to make inspiration happen and last. Through stories of pioneers in business, health, education, and other industries, readers learn how to effectively use the engines to spark inspiration, along with specific practices to sustain it. *Dare to Inspire* features Chef Wes Avila, the founder of L.A. sensation *Guerrilla Tacos*, who was inspired to revolutionize his industry; crowdfunding pioneer Charles Best, who founded *DonorsChoose* to meet the challenge of connecting teachers in need with donors interested in supporting educational programs; and many others. This will be a vital book for anyone interested in creativity, success, achievement, and happiness.

Debating the Woman Question in the French Third Republic, 1870-1920 Ludwig von Mises Institute

My Thoughts provides a unique window into the mind of one of the undisputed pioneers of modern thought, the author of the 1748 classic, *The Spirit of the Laws*. From the publication in 1721 of his first masterpiece, *Persian Letters*, until his death in 1755, Montesquieu maintained notebooks in which he wrote and dictated ideas on a wide variety of topics. Some of the contents are early drafts of passages that Montesquieu eventually placed in his published works; others are outlines or early versions of projected works that were ultimately lost, unfinished, or abandoned. These notebooks provide important insights into his views on a broad range of topics, including morality, religion, history, law, economics, finance, science, art, and constitutional liberty. Montesquieu called these notebooks *Mes Pensées* (*My Thoughts*), and they appear in their entirety in English for the first

time in this Liberty Fund edition. Editor and translator Henry C. Clark provides readers with translations of most of the footnotes contained in the 1991 French edition by Louis Desgraves, while adding new notes, a bibliography, and other aids to understanding the text and translation. These features provide the frame for a revealing portrait of one of the most influential figures of the eighteenth century. Henry C. Clark is a Visiting Professor in the Political Economy Project at Dartmouth College. He has written two books and numerous articles, mainly on the French and Scottish Enlightenments.

Confessions of an Economic Hit Man Cambridge University

Press

In the spring of 1959, eighteen-year-old Bruce Lee returned to San Francisco, the city of his birth. Although the martial arts were widely unknown in America, Bruce encountered a robust fight culture in the Bay Area, populated with talented and trailblazing practitioners such as Lau Bun, Chinatown's aging kung fu patriarch; Wally Jay, the innovative Hawaiian jujitsu master; and James Lee, the Oakland street fighter. Regarded by some as a brash loudmouth and by others as a dynamic visionary, Bruce spent his first few years back in America advocating for a modern approach to the martial arts, and showing little regard for the damaged egos left in his wake. The year of 1964 would be an eventful one for Bruce, in which he would broadcast his dissenting worldview before the first great international martial arts gathering, and then defend it by facing down Wong Jack Man—Chinatown's young kung fu ace—in a legendary behind-closed-doors showdown. These events were a catalyst to the dawn of martial arts in America and a prelude to an icon. Based on over one hundred original interviews, Striking Distance chronicles Bruce Lee's formative days amid the heated martial arts proving ground that thrived on San Francisco Bay in the early 1960s.
