Never Let Me Go Nelson Thornes
George Orwell was a much-respected English novelist, who wrote some of the finest pieces in literary criticism, fiction. Orwell’s work is known for its simplicity and wit. He wrote with smartness on subjects such as anti-fascism, democratic socialism etc. His best works include “ANIMAL FARM”. It’s an allegorical novella. It got published in August 1945. The fiction based on Farm animals, the author has named them too. Such as Major (a majestic-looking pig), 3-dogs (Bluebell, Jessie, and Pincher), many hens, pigeons, ducklings, sheeps and cows. Two horses, Boxer and Clover. Amongst them, Major is their leader. He wanted to speak on “the nature of life on this earth” and “How any animal is now living”. The author has nicely elaborated through these Characters about the animals’ misery and slavery. Animals complain that despite their hard labour, why then do they continue in the miserable condition? They also complain about human beings that they use to steal nearly the whole of their produce. Their main enemy is - Man. So, remove Man from the scene and the root cause of hunger and overwork will be abolished for ever. The book narrates about the agony of ill-treated farm animals. Then what decision they take and how this Animal Farm born, everything has become very interesting. The ultimate satire on fascism. A must-read book. “A Wise, Compassionate, and Illuminating Fable for our Times” THE NEW YORK TIMES “Orwell’s Satire is Amply Broad, Cleverly Conceived, and Delightfully Written” SAN FRANCISCO CHRONICLE “Absolutely First-Rate... Comparable to Voltaire and Swift” THE NEW YORKER The Effectiveness of BBC Bitesize for Learning Science by KS3 Learners in the UK. Henry Holt and Company

The number of new infectious diseases has dramatically risen in the last decades. The current coronavirus pandemic is in some ways unprecedented, but it also exposes an alarming pattern. The World Health Organization reports infectious diseases kill more than 17million people a year and more 30 new diseases have appeared in the last two decades. The complexity of tackling infectious diseases is also due to the world travel due to effluent of many developed countries. A health crisis on the other side of the globe is just a plane ride away. Currently, for many of these diseases, there is no treatment, cure, or vaccine. Medical chronic conditions like diabetes complicate health issues, more people will have weaker immune responses to fight off these burgeoning health threats. Hence the best form of defence against such infectious diseases is prevention, this book focuses on methods used to combat such diseases, as the old proverbial saying “Prevention is Better Than Cure”.

The Woman in Black Llewellyn Worldwide

While society and culture are closely related, there are minute differences that separate the two. But what is society without culture? Society is the community that surrounds an individual. This community has its own personality and this is how culture is introduced. Many societies are organized in stratified classes and these different classes can cause issues in a society. The gap between the rich and poor classes can sometimes create lasting effects on the individuals that live in these class situations. How does society further affect the individual? This title aims to answer this question through providing readers with foundational information on what society means and how societies are organized. Photographs and fact boxes supplement information present in the text and will spark readers’ interest in learning more about the subject matter.

Random House

A monster assembled by a scientist from parts of dead bodies develops a mind of his own as he learns to loathe himself and hate his creator. Shelley's suspenseful and intellectually rich gothic tale confronts some of the most important and enduring themes in all of literature-the power of human imagination, the potential hubris of science, the gulf between appearance and essence, the effects of human cruelty, the desire for revenge and the need for forgiveness, and much more.

Writing Powerful Persuasive Pieces Kogan Page Publishers
"Tom is not prepared for what is about to happen when he hears the grandfather clock strike thirteen. Outside the back door is a garden, which everyone tells him does not exist."--Page 4 de la couverture.

Jane Eyre Lexington Books

This book constitutes the proceedings of the 14th European Conference on Technology Enhanced Learning, EC-TEL 2019, held in Delft, The Netherlands, in September 2019. The 41 research papers and 50 demo and poster papers presented in this volume were carefully reviewed and selected from 149 submissions. The contributions reflect the debate around the role of and challenges for cutting-edge 21st century meaningful technologies and advances such as artificial intelligence and robots, augmented reality and ubiquitous computing technologies and at the same time connecting them to different pedagogical approaches, types of learning settings, and application domains that can benefit from such technologies.

The 30 Day MBA in Business Finance provides a complete 'course' in business finance, covering 13 key topics which fall under three main headings - the Fundamentals of Business Finance, Corporate Capital Structures and Financial Strategies and Special Topics. Learn what they teach you at the world's top accountancy firms and Business Schools and why it matters to you. With guidance on understanding financial reports, assessing the credit worthiness of business partners, determining profitable strategies, raising finance and ensuring proper records, this book contains everything you need to eliminate gaps in your financial knowledge, think like a financial strategist and become a top manager.

How to Raise a Tech Genius Hyweb Technology Co. Ltd.
A witty, irreverent tour of history's worst plagues—from the Antonine Plague, to leprosy, to polio—and a celebration of the heroes who fought them In 1518, in a small town in Alsace, Frau Troffea began dancing and didn't stop. She danced until she was carried away six days later, and soon thirty-four more villagers joined her. Then more. In a month more than 400 people had been stricken by the mysterious dancing plague. In late-seventeenth-century England an eccentric gentleman founded the No Nose Club in his gracious townhome—a social club for those who had lost their noses, and other body parts, to the plague of syphilis for which there was then no cure. And in turn-of-the-century New York, an Irish cook caused two lethal outbreaks of typhoid fever, a case that transformed her into the notorious Typhoid Mary. Throughout time, humans have been terrified and fascinated by the diseases history and circumstance have dropped on them. Some of their responses to those outbreaks are almost too strange to believe in hindsight. Get Well Soon delivers the gruesome, morbid details of some of the worst plagues we’ve suffered as a species, as well as stories of the heroic figures who selflessly fought to ease the suffering of their fellow man. With her signature mix of in-depth research and storytelling, and not a little dark humor, Jennifer Wright explores history’s most gripping and deadly outbreaks, and ultimately looks at the surprising ways they’ve shaped history and humanity for almost as long as anyone can remember. *Activities for Enriching and Expanding Social Studies Instruction K?12* Robinson
Have you ever experienced the seemingly inexplicable? A sense of being stared at? Thinking of something just as someone else says it? For these brief moments you are sensing the vibrations and thought patterns of others. In this highly readable personal story, Margaret takes us on her own journey as she highlights the roles of food and thought as sources of healing in our lives. Margaret draws on her own family’s experiences, sharing very personal stories of health and ill-health and their surrounding circumstances while growing food ‘to feed the world’. She explains, in a fascinating account, how and why our food has lost its nutrition and shows us how this can be

reversed. Margaret also draws on ancient practices of vibrational medicine, and explains how these practices can be easily embraced in our modern world, helping us return to our intuition and use focused thought to help aid our levels of wellness. Wow, what a book! This is one of the most fascinating sprints through cutting edge wellness thinking I've read in a long time. And I do a lot of reading." - Joel Salatin, farmer, author, integrity food advocate Margaret Bridgeford has woven incisive research to create a vivid image of the landscapes of soil, body and soul, revealing the vibrational connection between them all. Margaret Bridgeford convincingly ignites a call to action." - Kathryn Brimblecombe-Fox, Visual Artist

Teach computing concepts without computers! How to Raise a Tech Genius makes the computing curriculum accessible for parents and families. We live in a digital world - one in which our children are surrounded by technology. It's a part of their lives in a way that even the most tech-savvy adults aren't fully able to comprehend. What we do know is that the workplace of tomorrow will require our children to harness the power behind the technology, to be able to understand key concepts and apply them. Logical reasoning, creativity and problem solving are skills that are becoming increasingly essential in the world of work. How can we best prepare our children to enter this world? How to Raise a Tech Genius is a practical book that assumes no prior knowledge

or understanding of computing and enables parents to learn skills and concepts alongside their children. The quick, easy and fun fifteen-minute activities within the book have been developed using first-hand teaching expertise and are fully mapped to the computing curriculum taught in schools. From a deck of playing cards to the story books on your bookshelf or even the contents of your fridge, How to Raise a Tech Genius uses everyday objects that can be found around your home to illustrate core computer science concepts. Children and adults alike will enjoying playing games while developing their algorithmic thinking and logical reasoning skills. This book demystifies the computing curriculum for adults, showing parents a whole new side of computing, coding and technology so that they can help their child become a computing genius!
