 Social impacts are increasingly used as one of the main justifications

for staging and funding events, and yet there is very little empirical evidence on the extent to which these impacts are realised by different kinds of events or in different settings. This timely volume fills this gap by being the first to explore the different social aspects of events, looking in particular at the role of events in developing social capital, social cohesion and participation in local communities. Based on cutting edge empirical research, it evaluates the contribution

of both cultural and sports events to social capital, social cohesion, community spirit and local pride in range of different types of events and settings, with case studies drawn from Europe, Australia and South Africa. It therefore furthers knowledge about the social benefits and impacts of events and significantly contributes to the development of Events as a discipline. Written by leading academics in this area, this volume is essential reading for all those

interested in Events Management and Studies.

**Boekblad** Elektor International Media "Provides service and repair information for the

fifth generation, also known as the A5 platform Volkswagen Jetta"-- Provided by publisher. *Volkswagen Jetta, Golf, GTI: 1993-1999 Cabrio* Veloce Publishing Ltd Since the early 2000s, the apparent explosion of interest in Volkswagens with original paint, rust and patina has inspired a generation of car fanatics, who might not be able to afford to restore a car to show condition, but still want a good looking, cool car that will stand out from the crowd. Once looked upon as being in

need of restoration, cars with original paint, rust and patina, especially within the global Volkswagen community, have gradually become far more popular than restored cars. When walking down a line of cars at a car show, it's easy to see why; these cars are rare, unspoiled survivors - cars that tell a story of an interesting and varied past. The look of the Volkswagens being built in this style is so honest, unspoiled and characterful, that it has begun to inspire the

media; even Hollywood movie stars and celebrities. Whilst this has undoubtedly resulted in increased car values, and turned a brand of cars that had always been a cheap, honest mode of transportation into something cool with a high price tag, the generation it initially inspired has grown with the hobby, and produced a micro-industry that still manages to embrace the 'Built not bought' ethos. This book, superbly illustrated with stunning colour photographs, takes

an inside look at some of the key car builders, dealers, celebrities and hobbyists, as well as the different styles of build, meaning every single car has a style all its own.

Foreword by Drew Pritchard of TV's 'Salvage Hunters' fame.
