Artist Management for
the Music Business

SAGE

The Journal of School Public Relations is a quarterly publication providing research,

analysis, case studies and descriptions of best practices in six critical areas of school administration: public relations, school and community relations, community education, communication, conflict management/resolution, and human

resources management. Practitioners, policymakers, consultants and professors rely on the Journal for cutting-edge ideas and current knowledge. Articles are a blend of research and practice addressing contemporary issues ranging from passing bond referenda to building support for school programs to integrating modern information.

1975: January-June

Houghton Mifflin
Harcourt

The nature of the communicator's job has changed dramatically over the last decade. While communicators still prepare speeches, press releases and articles for corporate magazines, they are

now being asked to perform managerial duties such as planning, consulting stakeholders and advising CEO's and vice presidents. Communication Planning focuses on these additional responsibilities and examines the role of integrated planning in modern organizations. Sherry Ferguson's comprehensive study includes the theoretical foundations of communication planning and strategic approaches to planning for issues management.

Literacy offers writing instructors and literacy scholars a framework for understanding and responding to the challenges posed by the proliferation of interactive and multimodal communication technologies in the twenty-first century. Employing case-study research of student reading practices, Keller explores reading-writing connections in new media contexts. He identifies a culture of acceleration—a gathering of social, educational, economic, and technological forces that reinforce the values of speed, efficiency, and change—and challenges educators to balance new “faster” literacies with traditional “slower”

literacies. In addition, Keller details four significant features of contemporary literacy that emerged from his research: accumulation and curricular choices; literacy perceptions; speeds of rhetoric; and speeds of reading. *Chasing Literacy* outlines a new reading pedagogy that will help students gain versatile, dexterous approaches to both reading and writing and makes a significant contribution to this emerging area of interest in composition theory and practice. *Strategy Instruction for Middle and Secondary Students with Mild Disabilities* SAGE Communication in organizations has changed drastically since the release of the first edition of this bestselling textbook.

This fully revised and updated edition delves into state-of-the-art studies, providing fresh insights into the challenges that organizations face today. Yet this foundational resource remains a cornerstone in the examination of classic research and theory in organization communication.

 Running Behavioral Experiments With Human Participants: A Practical Guide, by Frank E. Ritter, Jong W. Kim, Jonathan H. Morgan, and Richard A. Carlson, provides a concrete, practical roadmap for the implementation of experiments and controlled observation using human participants. Ideal for those with little or no practical experience in research methodology, the text covers both conceptual and practical issues that are critical to implementing an

experiment. The book is organized to follow a standard process in experiment-based research, covering such issues as potential ethical problems, risks to validity, experimental setup, running a study, and concluding a study.

A practical, highly accessible guide for novice researchers conducting qualitative research in public relations and marketing communications, this book guides the reader through all aspects of the research process.

Designing Health

Messages Greenwood

Allen prepares you for the realities of successfully directing the careers of talented performers in the high-risk, high-reward music business. You will learn to prepare yourself for a career in artist management - and then learn the tools to

coach, lead, organize time, manage finances, market an artist, and carve out a successful career path for both yourself and your clients. The book features profiles of artist managers, an exclusive and detailed template for an artist career plan, and samples of major contract sections for artist management and record deals. Updated information including a directory of artist management companies is available at the book's companion website. A peer reviewer for Artist Management for the Music Business proclaimed ".this is going to be an excellent text. It contains many unique insights and lots of valuable information. This is essential

reading for managers, students, and artists in the music business.

The decision to release someone from psychiatric hospital, forensic services or prison is often controversial, and forensic psychologists play a key role in assessing the risk of recidivism. In Violence Risk, Chris Webster and Steve Hucker discuss the accuracy of prediction and highlight how violence

assessments would improve if well-established findings became entrenched in clinical and research practice. Although the authors write the majority of the text, specialist colleagues add essential material on subjects such as averting spousal assault, sex offending, and improving community support.

JLPT Study Guide SAGE Engaging Theories in Family Communication, Second Edition delves deeply into the key theories in family communication, focusing on theories originating both within the communication discipline and in allied disciplines. Contributors write in their specific areas of expertise, resulting in an exceptional resource for scholars

and students alike, who seek to understand theories spanning myriad topics, perspectives, and approaches. Designed for advanced undergraduate and graduate students studying family communication, this text is also relevant for scholars and students of personal relationships, interpersonal communication, and family studies. This second edition includes 16 new theories and an updated study of the state of family communication. Each chapter follows a common pattern for easy comparison between theories.
