Financial statements are the report card of a business. Whether you are a new investor, a small business owner, an executive, or just trying to keep track of your personal finances, you need to understand how to read, analyze, and create financial statements so you can get a full and accurate understanding of your finances. Financial statements will tell you how much money the operation has stashed away, how much debt is owed, the income coming in each month, and the expenses going out the door.

Guide to Understanding Financial Statements

Prepare financial statements Step 1: Analyze and record transactions

The first step in the accounting cycle is gathering records of your business transactions—receipts, invoices, bank statements, things like that—for the current accounting period. This is the raw financial information that needs to be translated into something useful.

A Beginner's Guide to The Accounting Cycle - BenchStep 3: Estimate cash flows. This portion of the pro forma statement will project your future net income, sale of assets, dividends, issuance of stocks, etc. This is the second section of your pro forma financial statement.

Step 4: Create the chart of accounts. This chart of accounts will make up the pro forma statement for a 3 to 5 year period.

The "Balance Sheet", also known as "Statement of Financial Position", shows a company's financial condition as of a certain date. Financial condition is presented by reporting how much assets the company owns, how much liabilities it owes to others, and its equity or capital.
