HERRING MAREN

InfoWorld Routledge

After describing the functions of the PC and the role of computers in local and global networks, the authors explain the fundamentals of data management, as well as the support of firms' functions and processes through information processing. The concepts utilized are deployed in a multitude of modern and integrated application systems in manufacturing and service industries. These application examples make up the core of the book. Many application examples illustrate the methodologies addressed.

Hotel Front Office Management Springer Nature

This book reports on cutting-edge research related to social and occupational factors. It presents innovative contributions to the optimization of sociotechnical management systems, which consider organizational, policy, and logistical issues. It discusses timely topics related to communication, crew resource management, work design, participatory design, as well as teamwork, community ergonomics, cooperative work, and warning systems. Moreover, it reports on new work paradigms, organizational cultures, virtual organizations, telework, and quality management. The book reports on cutting-edge infrastructures implemented for different purposes such as urban, health, and enterprise. It discusses the growing role of automated systems and presents innovative solutions addressing the needs of special populations. Based on the AHFE 2017 International Conference on Social and Occupational Ergonomics, held on July 17-21, 2017, in Los Angeles, California, USA, the book provides readers with a comprehensive view of the current challenges in both organizational and occupational ergonomics, highlighting key connections between them and underlining the importance of emotional factors in influencing human performance.

Hotel Law, Transactions, Management and Franchising presents a practical guide to the issues that face lawyers and industry leaders working in the hospitality field. It aims to develop the reader's understanding of the acquisition process and the complex relationships in management and franchise deals that dominate the hotel industry. This text is written primarily as a desktop reference for legal practitioners working in the hotel law field and is also suitable for students studying towards hotel and hospitality careers both at an undergraduate and law school or graduate level. The highly experienced author, contributors and editors offer insights into the industry players and their preferred positions, desired outcomes, and the potential pitfalls that can ensnare even the most well-planned deals. With broad coverage of the rapidly growing field of hospitality law—including gaming, recreation, and amenities—the book's approach examines the dominant models of hotel ownership, management and franchising, and includes independent hotels and the move towards complex resorts. The book's coverage of key legal topics ranges from real estate, to intellectual property, contracts, and finance. Hotel Law will give readers an understanding of the hospitality industry from the perspective of the transactional practitioner, while examining the multi-party relationships and agreements that develop between an owner, operator, licensor and lender. This volume includes extended and revised versions of a set of selected papers from the 2011 2nd International Conference on Education and Educational Technology (EET 2011) held in Chengdu, China, October 1-2, 2011. The mission of EET 2011 Volume 1 is to provide a forum for researchers, educators, engineers, and government officials involved in the general areas of education and educational technology to disseminate their latest research results and exchange views on the future research directions of these fields. 130 related topic papers were selected into this volume. All the papers were reviewed by 2 program committee members and selected by the volume editor Prof. Yuanzhi Wang, from Intelligent Information Technology Application Research Association, Hong Kong. The conference will bring together leading researchers, engineers and scientists in the domain of interest. We hope every participant can have a good opportunity to exchange their research ideas and results and to discuss the state of the art in the areas of the education and educational technology.

Transactions, Management and Franchising Routledge

This study aims to assess in the hotel industry's retention management of the rank-and-file employees in terms of the demographic profiles and the level of influence and level of importance of the success factors of selected major hotels operating in Abu Dhabi of the United Arab Emirates as assessed by the managers. The descriptive-correlational research was applied. The researcher prepared a structured survey questionnaire. It examines the current phenomenon that happens within Abu Dhabi's hotel industry. The eight factors used throughout this study comprises of compensation and benefits, rewards and recognition, work environment and culture, recruitment and selection, career development and training, job design and work teams, performance and management evaluation, and communications. Correlation analysis tested the relationship between a profile of the respondents and their perceptions on the level of influence and level of importance of the factors of employee retention, and the difference between the perception of managers and rank-and-file employees on the level of importance and level of influence of the success factors of employee retention. The findings show that the role of the manager in the retention management of the rank-and-file employees was due to the level of influence and level of importance. As to the level of influence, the work environment and corporate culture were assessed by the managers to be the most influential success factor which was followed by performance management and evaluation, and job design and work teams. As to the level of importance, communication was assessed as the most important among all retention factors. The reason is due to good communication skill expected in the hospitality industry. Other considerations was on the recruitment and selection and performance management and evaluation. As a conclusion, the five success factors that helped the hotel industry in retaining their good employees for sustainable operations, include the work environment and corporate culture, performance management and evaluation, job design and work teams, communication, and recruitment and selection. As a result of the study, it is recommended that the hotel management should maintain the relationship of the level of influence and the level of importance with the respondents' profiles in terms of age, highest educational attainment, hotel classification, position, and years of service basing from their significance and the rejection of the hypothesis. Key Terms: Descriptive-Correlational type of Research, Level of Influence, Level of Importance, Success Factors, Retention Management, Hotel Industry in Abu Dhabi.

[MAHARASHTRA HOTEL MANAGEMENT CET-MAH-B.HMCT-CET EBOOK-PDF](#) John Wiley & Sons

This practice- and research-based book caters to the needs of executive managers who see customer satisfaction as their primary goal. The authors identify the need for an effective complaint

management strategy that prevents the loss of dissatisfied customers. Dissatisfied customers are at risk of migrating; accordingly, neglecting professional complaint management poses a considerable threat to customer relationships, sales and profits. The book offers a comprehensive management concept, which emphasizes direct contact with the complainant by employing complaint stimulation, acceptance, processing and reaction. Further, it discusses the relevant 'backstage' tasks involved in using complaint information to achieve quality improvements and cost reductions through complaint analysis, controlling and reporting.
