Experiments in Plant

Tissue Culture makes available new information that has resulted from recent advances in the applications of plant tissue culture techniques to agriculture and industry. This comprehensive laboratory text takes the reader through a graded series of experimental protocols and also provides an introductory review of each topic. Topics include: a plant tissue culture laboratory, aseptic techniques, nutritional components of media, callus induction, organ formation, xylem cell differentiation, root cultures, cell suspensions, micropropagation, embryogenesis, isolation and fusion of protoplasts, haploid

cultures, storage of plant genetic resources, secondary metabolite production, and quantification of procedures. This volume offers all of the basic experimental methods for the major research areas of plant tissue culture, and it will be invaluable to undergraduates and research investigators in the plant sciences.

Surface organometallic chemistry is a new field bringing together researchers from organometallic, inorganic, and surface chemistry and catalysis. Topics ranging from reaction mechanisms to catalyst preparation are considered from a molecular basis, according to which the

"active site" on a catalyst surface has a supra-molecular character. This, the first book on the subject, is the outcome of a NATO Workshop held in Le Rouret, France, in May, 1986. It is our hope that the following chapters and the concluding summary of recommendations for research may help to provide a definition of surface organometallic chemistry. Besides catalysis, the central theme of the Workshop, four main topics are considered: 1) Reactions of organometallics with surfaces of metal oxides, metals, and zeolites; 2) Molecular models of surfaces, metal oxides, and metals; 3) Molecular approaches to the mechanisms of surface

reactions; 4) Synthesis and modification of zeolites and related microporous solids. Most surface organometallic chemistry has been carried out on amorphous high-surface-area metal oxides such as silica, alumina, magnesia, and titania. The first chapter, contributed by KNOZINGER, gives a short summary of the structure and reactivity of metal oxide surfaces. Most of our understanding of these surfaces is based on acid base and redox chemistry; this chemistry has developed from X-ray and spectroscopic data, and much has been inferred from the structures and reactivities of adsorbed organic probe molecules. There are

major opportunities for extending this understanding by use of well-defined (single crystal) oxide surfaces and organometallic probe molecules.

The contributors to Monster Theory consider beasts, demons, freaks and fiends as symbolic expressions of cultural unease that pervade a society and shape its collective behavior.

Through a historical sampling of monsters, these essays argue that our fascination for the monstrous testifies to our continued desire to explore difference and prohibition.

The first edition of "The iPhone Book" was chosen by Amazon's editors as their Computer/Technology Book of the Year. This new version of the book, totally updated and expanded for the 3G iPhone, was chosen by Amazon as one of their "Top 10 Must-Have Books" in their annual list of the most "gift-worthy" books of the holiday season. Here's why this book has become such a hit with iPhone users around the world: it's not a "Tell-me-all-

about-it" book, which has in-depth discussions on everything from wireless network protocols to advanced compression codes. Instead it's a "show-me-how-to-do-it" book, that skips all the confusing techno-jargon and just tells you, in plain simple English, exactly how to use the iPhone features you want to use most. The book's layout is brilliant, with each page covering just one single topic, so finding the information you need is quick and easy, with a large full-color photo on each page so you can see exactly how it works. In this book, you'll learn:

- How to set up and manage your email the right way from the start
- How to take advantage of the

iPhone's Web features (including important tips that help you avoid frustration, and get you where you want to go fast!) • How to download and install applications from Apple's online App Store • The key trouble-shooting tips you've got to know • How to get your favorite photos onto your iPhone, tips for using its built-in camera, and how to make the most of the iPhone's surprisingly powerful photo features • The tips you've got to know to use your iPhone's built-in iPod features, including watching videos, podcasts, TV shows and movies (you're going to be amazed at some of the cool things you can do) • How to use the iPhone's built-in

applications to organize your life (you'll learn things in this chapter you didn't know the iPhone could do!) • The top 20 tips for the iPhone's phone feature that will make you fall in love with it (you'll never want to use any other phone again) • Plus so much more, including a special bonus chapter called "iPhone Killer Tips" where you'll learn those hidden secrets that you'll be passing on to your iPhone friends (and they will be amazed!). The iPhone Book is from Scott Kelby, the award-winning author of the smash bestseller, The iPod Book, who teams up once again with gadget guru, and iPhone authority, Terry White to put together a book that is an awful lot like the iPhone

itself—simple to use and fun to learn. In this major update to the book, Scott and Terry added even more tips, more tricks, and made it even easier by focusing on just the most useful and most requested features (without all the technobabble) so you can start really using your iPhone today! **BONUS VIDEO:** The authors put together a special in-depth video just for readers of the book where they not only share their favorite iPhone accessories, but they share even more of those hidden little time-saving tips that can make all the difference in the world. If you've been waiting for a book that focuses on just the most important, most useful, and most fun stuff about your

iPhone—you've found it.

A valuable resource for creating distance education programs for radio, TV, Internet and mobile, using an entertainment-education approach. This volume explains how to integrate education into an entertaining format so that it holds people's attention while enabling them to improve their health and lifestyle. It also demonstrates how mobile technologies can be used for educating frontline health workers as well as the communities they serve. This book offers many examples of such programs and provides essential guidance on: •

Understanding precisely what knowledge must be imparted to the communities and how.

- Why mobile technology is the new and most important platform for delivering educational content.
- How educational programs can be designed for developing countries in a sustainable way.

This book discusses the unique nature and complexity of fog data analytics (FDA) and develops a comprehensive taxonomy abstracted into a process model. The exponential increase in sensors and smart gadgets (collectively referred as

smart devices or Internet of things (IoT) devices) has generated significant amount of heterogeneous and multimodal data, known as big data. To deal with this big data, we require efficient and effective solutions, such as data mining, data analytics and reduction to be deployed at the edge of fog devices on a cloud. Current research and development efforts generally focus on big data analytics and overlook the difficulty of facilitating fog data analytics (FDA). This book presents a model that addresses various research challenges, such as accessibility, scalability, fog nodes communication, nodal collaboration, heterogeneity, reliability, and quality

of service (QoS) requirements, and includes case studies demonstrating its implementation. Focusing on FDA in IoT and requirements related to Industry 4.0, it also covers all aspects required to manage the complexity of FDA for IoT applications and also develops a comprehensive taxonomy.

This book critically examines the cultural politics of visuals in South Asia. It makes a key contribution to the study of visuals in the social sciences in South Asia by studying the interplay of the seen and unseen, and the visual and nonvisual. The volume explores interrelated

themes including the vernacular visual and visibility, ways of seeing in South Asia and the methodology of hermeneutic sensorium, anxiety and politics of the visuals across the region and the trajectory of visual anthropology, significance of visual symbols and representations in contemporary performances and folk art, visual landscapes of loss and recovery and representation of refugees, visual public in South Asia and making of visuals for contemporary consumptions. The chapters unravel the concepts of visual, visibility, visibility while attending to determinant meta-ideas, such as memory and modernity, trajectories of tradition,

fluidity and hybridity, and visual performative politics. Based on interdisciplinary resources, the chapters in this volume present a wide array of empirical findings across India, Pakistan, Sri Lanka, Nepal and Bangladesh, along with analytical readings of the visual culture of the subcontinent across borders. The book will be useful to scholars and researchers of visual and cultural studies, social and cultural anthropology, sociology, political studies, media and communications studies, performance studies, art history, television and film studies, photography studies, and South Asian studies. It will also interest

practitioners including artists, visual artists, photographers, filmmakers and media critics.

Investing in the stock market is challenging, as the market dynamics are unpredictable.

Analysts, brokers and retail investors realize to their dismay that investments do well, but investors don't do well. What could be the reasons behind this? What goes on in an investor's mind? What makes a stock market bubble? How does it burst? How does one find the right strategy of investing? Intrigued by these pertinent questions, Parag Parikh, a seasoned broker and expert, took up this daunting task of understanding and demystifying investing in the stock market. *Stocks to Riches* is a distillate of his

experience. It simplifies investing in stocks and provides key perspectives for a lay investor venturing into the market. At the end of the day, *Stocks to Riches* helps the retail investor make money by following the time-tested and proven guidelines provided in the book. A must read for brokers, analysts and retail investors. *Reverse Engineering Code with IDA Pro* Morgan & Claypool Publishers

Who This Book Is For
This book is for developers who have a basic understanding of Java language and have 6-12 months of experience with Android development and developers who feel comfortable with OOP concepts. What You Will Learn
Run a Kotlin application and understand the integration with Android Studio
Incorporate Kotlin into new/existing Android Java based project
Learn about Kotlin type system to deal with null safety and immutability
Define various types of classes and deal with properties
Define collections and transform them in

functional way
Define extensions, new behaviours to existing libraries and Android framework classes
Use generic type variance modifiers to define subtyping relationship between generic types
Build a sample application
In Detail
Nowadays, improved application development does not just mean building better performing applications. It has become crucial to find improved ways of writing code. Kotlin is a language that helps developers build amazing Android applications easily and effectively. This book discusses Kotlin features in context of Android development. It demonstrates how common examples that are typical for Android development, can be

simplified using Kotlin. It also shows all the benefits, improvements and new possibilities provided by this language. The book is divided in three modules that show the power of Kotlin and teach you how to use it properly. Each module present features in different levels of advancement. The first module covers Kotlin basics. This module will lay a firm foundation for the rest of the chapters so you are able to read and understand most of the Kotlin code. The next module dives deeper into the building blocks of Kotlin, such as functions, classes, and function types. You will learn how Kotlin brings many improvements to the table by improving common Java concepts and decreasing code

verbosity. The last module presents features that are not present in Java. You will learn how certain tasks can be achieved in simpler ways thanks to Kotlin. Through the book, you will learn how to use Kotlin for Android development. You will get to know and understand most important Kotlin features, and how they can be used. You will be ready to start your own adventure with Android development with Kotlin.

Most of the women in the newly formed book club were simply looking for friendship, a good read and maybe even a few dating tips. Greed snowballs into jealousy and hatred

and several women realize too late they've been roped into crimes that force them to flee for their lives. Alyssa: Cougar-complete with short skirts, stiletto heels and an insatiable appetite Bess: Desperate-looking for love in all the wrong places Julianna: Girl-Next-Door-low self-confidence and bad judgment leads her astray Traci: Cunning-determined to get what she wants, no matter who gets in the way Aaron: Is he part of the crime circle or is he capable of saving the woman he loves? BLACKMAIL. MURDER. ROMANCE. Four women. Four personalities. Who will Overcome; Who will Survive? *** After being divorced for several years, Julianna decided to join a book

club she found online so she could make new friends and read a good book or two. She was anxious and eager to get started with the first book chosen by the group, a dating book. It just so happened that a week after the book club formed, she began dating a man who contacted her via a dating site, and she found a new friend, Bess, at the book club so for Julianna, everything so far seemed to be working out harmoniously. Several weeks later, the leader of the book club, Traci, convinced the women of the group into filming their dates so that the group can "critique" them with the pretense that it will improve their dating skills. Innocent "critiquing" soon

turned into filming a sex tryst in a seedy hotel and Julianna and Bess are unwilling participants, unable to get out from under Traci's web of deceit and sinister plans. After successfully blackmailing the man unknowingly involved in that "date" with the assistance of the group's sexy cougar, Alyssa, Traci generously hand delivers a portion of the money to Julianna and Bess. Generosity is not Traci's motive, however, and the next time she orchestrates a "date critique," a man unfortunately dies. Since Julianna and Bess are now involved in Traci's crimes- blackmail and murder- they are afraid and too deep in the crime spree to go to the police. In the midst of

all this, Julianna and her new boyfriend, Aaron, are hitting it off but it soon turns into suspicion, hurt and mistrust when Bess accidentally witnessed Aaron coming out of Traci's house. Bess is determined to find some answers to this puzzle and to Traci's motivations but her inquisitive mind leads her to a tragic end and soon even Julianna is fighting for her life as she tries to get out from under Traci and Alyssa's evil plans. BLACKMAIL. MURDER. ROMANCE. Who will overcome; Who will survive?

What happens at the nexus of the digital divide and human

trafficking? This book examines the impact of the introduction of new digital information and communication technology (ICT) – as well as lack of access to digital connectivity – on human trafficking. The different studies presented in the chapters show the realities for people moving along the Central Mediterranean route from the Horn of Africa through Libya to Europe. The authors warn against an over-optimistic view of innovation as a solution and highlight the relationship between technology and the crimes committed against vulnerable people in search of protection. In this volume, the third in a four-part series 'Connected and Mobile: Migration and Human

Trafficking in Africa', relevant new theories are proposed as tools to understand the dynamics that appear in mobile Africa. Most importantly, the editors identify critical ethical issues in relation to both technology and human trafficking and the nexus between them, helping explore

the dimensions of new responsibilities that need to be defined. The chapters in this book represent a collection of well-documented empirical investigations by a young and diverse group of researchers, addressing critical issues in relation to innovation and the perils of our time.
