A penetrating analysis of the modern architectural tradition and its origins. Since its first publication in 1982, *Modern Architecture Since 1900* has become established as a contemporary classic. Worldwide in scope, it combines a clear historical outline with masterly analysis and interpretation. Technical, economic, social and intellectual developments are brought together in a comprehensive

narrative which provides a setting for the detailed examination of buildings. Throughout the book the author's focus is on the individual architect, and on the qualities that give outstanding buildings their lasting value. For the third edition, the text has been radically revised and expanded, incorporating much new material and a fresh appreciation of regional identity and variety. Seven chapters are entirely new, including expanded coverage of recent world architecture. Described by James Ackerman of Harvard University as "immeasurably the finest work covering this field in existence", this book presents

a penetrating analysis of the modern tradition and its origins, tracing the creative interaction between old and new that has generated such an astonishing richness of architectural forms across the world and throughout the century.

The Future of Architecture Since 1889
MIT Press

This book presents essays by eminent scholars from across the history of medicine, early science and European history, including those expert on the history of the book. The volume honors Professor Nancy Siraisi and reflects the impact that Siraisi's scholarship has had on a range of fields. Contributions address

several topics ranging from the medical provenance of biblical commentary to the early modern emergence of pathological medicine. Along the way, readers may learn of the purchasing habits of physician-book collectors, the writing of history and the development of natural history. Modeling the interdisciplinary approaches championed by Siraisi, this volume attests to the enduring value of her scholarship while also highlighting critical areas of future research. Those with an interest in the history of science, the history of medicine and all related fields will find this work a stimulating and rewarding read.

Rizzoli International Publications

Jean Nouvel discusses his work from the outset to the latest projects, describing point by point his design philosophy and putting forward his ideas on the future of architecture.

Memorie del R. Istituto lombardo di scienze, lettere ed arti Prentice Hall

This book offers an overview of sustainability and urban mobility in the context of urban planning - topics that are of considerable interest in the development of smart cities.

Environmental sustainability is universally recognized as a fundamental condition for any urban policy or urban management activity, while mobility is essential for the survival of complex urban systems. The new opportunities offered by innovations in the mobility of people, goods and information, as well as radically changing interactions and activities are transforming cities. Including contributions by urban planning scholars, the book provides an up-to-date picture of the latest studies and innovative policies and practices in Italy, of particular interest due to its spatial, functional and social peculiarities. Sustainability and mobility must form the basis of "smart planning" - a new dimension of urban planning linked to two main innovations: procedural innovation in the management of territorial transformations and the technological innovation of the generation, processing and distribution of data (big data) for the creation of new "digital environments" such as GIS, BIM, models of augmented and mixed reality, useful for describing changes in human settlement in real time.

edilizia sociale, urbanistica, architettura :

un secolo dalla fondazione dell'Ater UPenn Museum of Archaeology

Analyzes newly-released archival material to examine the architect's projects as they relate to his philosophy of life, his social visions, and his cultural milieu

The Mediterranean Medina Princeton Architectural Press

The highly acclaimed history of the architecture of the twentieth century and beyond - now in paperback Jean-Louis Cohen, one of the world's leading architectural historians, serves up a compelling account of the developments that have shaped the world in which we live today. This highly accessible book begins with the Paris Universal Exposition of 1889, tracing architecture's evolution to the early twenty-first century's globalized architectural culture. Illustrated with hundreds of drawings and photographs as well as portraits, publications, diagrams, film stills, and more, this survey places radical developments in architecture in a larger context, among those of art, technology, urbanism, and critical theory.

Futurism and the Technological Imagination Springer

Congresso sui sei temi proposti (Teoria e metodi dell'archeologia medievale; Città; Campagna; Luoghi di culto e sepolture; Produzione, commercio e consumo; Archeologia delle architetture), sintetiche schede relative ai poster e un saggio introduttivo di Riccardo Francovich sulle politiche di conservazione e valorizzazione del patrimonio archeologico.

Domus L'architettura moderna del Novecento Modern Architecture Since 1900 "Rare archival illustrations show contemporary (1870-1900) photographs of the University of Pennsylvania Museum library and portraits of individual authors represented in the Brinton Library."--BOOK JACKET.

Toward an Architecture Getty Publications La lunga e intensa attività di Antonio Piva, architetto e docente universitario, documenta un saldo e costante impegno intellettuale sul progetto di architettura, affrontato con sensibilità, misura e senso di responsabilità. In base a un'idea di ragione e di progresso non riducibile a soluzioni autoreferenziali, la sua azione si confronta con le condizioni e le molteplici mediazioni del contesto, introducendo lo stimolo di argomentazioni teoriche

innovative come risorse per il progetto. L'attenzione di Piva ai riferimenti della contemporaneità traccia un nuovo indirizzo della cultura del progetto nella "Scuola milanese": l'inserimento dell'atto progettuale alla scala architettonica nel quadro interpretativo dell'attualità, come riflesso delle trasformazioni culturali e sociali. Instancabile organizzatore di eventi nella Facoltà di Architettura di Milano, Antonio Piva può essere definito un vero e proprio operatore culturale che ha aperto il progetto ai grandi temi dell'architettura: la città multietnica, la rete musei-territorio, il rapporto giardino paesaggio, gli archivi di architettura, le relazioni tra architettura e politica. La ricerca dell'integrazione multidisciplinare, praticata nella professione e nella didattica, e la fedeltà costruttiva all'eredità di Franco Albini e Franca Helg sono ulteriori fattori identificativi che fanno emergere la sua figura di architetto protagonista della cultura della seconda metà del XX secolo. Il suo campo di applicazione si avvale di un particolare interesse per la valorizzazione delle preesistenze architettoniche e il progetto del museo, come declinazione specifica

del rinnovamento degli spazi per la cultura. Le potenzialità strategiche dell'atto trasformativo del progetto sono messe al servizio di un'interpretazione rivolta al futuro e al senso etico delle decisioni che, in Piva, si delineano in risposte spaziali e formali misurate e "ragionevoli", in rapporto alle risorse offerte dalla realtà. Realtà, nella professione e nell'insegnamento, significa per Piva assumere progettualmente casi concreti, prendere coscienza delle risorse disponibili (spaziali e aspatiali), aprirsi ai messaggi e alle istanze della società che cambia e avere un ruolo propositivo nei margini di una fattibilità che, avvalendosi della tecnica e di verifiche alla scala di dettaglio, tende a raccordare tradizione e innovazione.

Ideas and Forms Springer Nature Luigi Moretti is the first English-language monograph on the Italian architect and will introduce his writings to the English-speaking world.

Modern Architecture Since 1900 Walter de Gruyter GmbH & Co KG Collana Architettura e Complessità diretta da Antonio Piva Per il terzo anno consecutivo, dopo Franca Helg e Marco

Zanuso, il Dipartimento di Architettura e Pianificazione della Facoltà di Architettura e Società del Politecnico di Milano - insieme al Dipartimento INDACO della Facoltà del Design, all'Accademia di Architettura dell'Università della Svizzera italiana e all'Archivio del Moderno di Mendrisio - celebra una delle figure fondanti la sua tradizione didattica, Vittoriano Viganò, autore, tra l'altro della "nuova" sede della Facoltà di Architettura e Società di via Ampère. Una riflessione nel riconoscimento della complessità umana e professionale di un architetto che ha fatto del suo lavoro una missione di vita, identificandolo con una componente etica e umana di grande rigore, trasferita in ambito accademico. Viganò ha vissuto le diverse scale della progettazione, facendo dell'interazione tra linguaggi, pensieri e tematiche un punto di forza della sua professione. I testi raccolti in questo libro documentano le due giornate di studi: a Milano, attraverso testimonianze che restituiscono la poliedricità dell'uomo e del professionista in un quadro relazionale allargato; a Mendrisio, che dedica gli interventi all'Istituto Marchiondi Spagliardi, opera

giovanile dell'architetto eretta tra il 1953 e il 1957, cui è stato recentemente apposto il decreto di vincolo monumentale dalla Soprintendenza per i Beni Architettonici e Ambientali. Testi di Antonio Piva, Elena Cao, Pier Carlo Palermo, Paolo Portoghesi, Cesare Stevan, Maria Antonietta Crippa, Vittorio Prina, Francesco Scullica, Pierfranco Galliani, Emilio Faroldi, Aurelio Cortesi, Isotta Cortesi, Arturo Dell'Acqua Bellavitis, Alba Cappellieri, Paolo Golinelli, Michele Porcu, Alberto Artioli e Gian Carlo Borellini, Bruno Reichlin, Franz Graf, Francesca Albani, Valeria Farinati, Gianni Ottolini, Alberto Grimoldi.

International Seminar Routledge

This volume collects the proceedings of the International Seminar The Mediterranean Medina, that took place in the School of Architecture at Pescara from 17th to 19th of June 2004.

Memorie del Reale istituto lombardo di scienze, lettere ed arti BRILL

Since 1970, based in an isolated building situated on the peninsula of Posillipo, Pica Ciamarra Associati (www.pcaint.eu) has acted as a laboratory of architectural and urban design which has gradually incorporated new members and new

energies over the time: using a multidisciplinary approach, the roots of the architectural practice lie in the intensive theoretical and practical work begun in the early 1960s by Massimo Pica Ciamarra. Since then the practice has been marked by a continuous relationship with Le Carré Bleu Feuille internationale d'architecture and leading members of the cultural milieu of Team 10: this has led to constant attention to everything that lies beyond form, to the relationship with contexts that also include non-spatial contexts, and to high levels of integration and dialectical discussion. According to Pica Ciamarra Associati, a design transcends the approaches of a single sector, providing simultaneous solutions to contradictory requirements, combining utopia and practicality. The poetics of the fragment: it mediates between architecture and the urban dimension; some designs also have the aim of becoming absorbed within a context as 'informed fragments'. This monograph is the result of an intensive period of work and consists of two interacting parts. It stems from research into the archive of the studio Pica Ciamarra and conversation with the

members of the architectural practice. Organised diachronically, the book tells the long story, unfolding over a period of over fifty years of a team of Neapolitan architects and designers, who have maintained the lively spirit of the practice which is still geared towards the future. The textual and iconographic account tells a story and offers an interpretation that highlight the vibrant atmosphere of the studio, based on a consistency of thought and action, and fuelled by an interest in many different forms of knowledge. The contextualisation of the events related to the studio, as they unfolded over time, is wide-ranging, coherent and connotative. Antonietta Iolanda Lima, professor of history of architecture at the University of Palermo, has always tried, through theory, teaching and design, to disseminate the importance of history which can embracing innovation and tradition to an equal degree, forming a new architectural language. According to her view of architecture, history and design are closely connected, a 'single entity' as is reflected by her career. Since the 1980s, her academic work has gained increasing importance, a way of avoiding narrow

sectoral approaches in the training of future architects, offering a holistic stance of the history of architecture and an architecture that contributes to shaping critical thought and a thriving cultural life. *Architettura e cultura del progetto* BRILL This book is open access under a CC BY 4.0 license "Francesca Billiani and Laura Pennacchiotti draw brilliantly and with precision the evolution of the new architecture and of the national novel (with insights on translations of international novels), whose profiles had been shaped from different angles, especially in the 1930s. These two fields, apparently so distant one from the other, had never been analysed in parallel. This book does this and uncovers several points of contact between the two, spanning propaganda and theoretical turning points." —Chiara Costa and Cornelia Mattiacci, Fondazione Prada, Italy "This book shows convincingly how the arte di Stato during Fascism was created with the morality of a new novel as well as architecture. It is surprising to read how one of the representatives of State art, Giuseppe Bottai, is also one of the finest critics of realist novels and rationalist

architecture. More than parallel endeavours, the system of the arts during the Fascist regime should be viewed as a series of intersections of cultural, political and aesthetic discourses." —Monica Jansen, Utrecht University, The Netherlands Architecture and the Novel under the Italian Fascist Regime discusses the relationship between the novel and architecture during the Fascist period in Italy (1922-1943). By looking at two profoundly diverse aesthetic phenomena within the context of the creation of a Fascist State art, Billiani and Pennacchiotti argue that an effort of construction, or reconstruction, was the main driving force behind both projects: the advocated "revolution" of the novel form (realism) and that of architecture (rationalism). The book is divided into seven chapters, which in turn analyze the interconnections between the novel and architecture in theory and in practice. The first six chapters cover debates on State art, on the novel and on architecture, as well as their historical development and their unfolding in key journals of the period. The last chapter offers a detailed analysis of some important novels and buildings,

which have in practice realized some of the key principles articulated in the theoretical disputes. Francesca Billiani is Senior Lecturer in Italian Studies and Director of the Centre for Interdisciplinary Research in the Arts and Languages at the University of Manchester, UK. Laura Pennacchietti is Research Associate in Italian Studies at the University of Manchester, UK.

architettura in Emilia-Romagna nel secondo Novecento 010 Publishers

Writing, according to Panayotis

Tournikiotis, has always exerted a powerful influence on architecture. Indeed, the study of modern architecture cannot be separated from a fascination with the texts that have tried to explain the idea of a new architecture in a new society. During the last forty years, the question of the relationship of architecture to its history -- of buildings to books -- has been one of the most important themes in debates about the course of modern architecture. Tournikiotis argues that the history of modern architecture tends to be written from the present, projecting back onto the past our current concerns, so that the "beginning" of the story really functions

as a "representation" of its end. In this book the buildings are the quotations, while the texts are the structure. Tournikiotis focuses on a group of books by major historians of the twentieth century: Nikolaus Pevsner, Emil Kaufmann, Sigfried Giedion, Bruno Zevi, Leonardo Benevolo, Henry-Russell Hitchcock, Reyner Banham, Peter Collins, and Manfredo Tafuri. In examining these writers' thoughts, he draws on concepts from critical theory, relating architecture to broader historical models.

Luigi Moretti Alinea Editrice

Rather than subscribing to a single position, this collection informs the reader about the current state of the discipline looking at changes across the broad field of methodological, theoretical and geographical plurality. Divided into three sections, *Rethinking Architectural Historiography* begins by renegotiating foundational and contemporary boundaries of architectural history in relation to other fields, such as art history and archaeology. It then goes on to critically engage with past and present histories, disclosing assumptions, biases and absences in architectural

historiography. It concludes by exploring the possibilities provided by new perspectives, reframing the discipline in the light of new parameters and problematics. This timely and illustrated title reflects upon the current changes in historiographical practice, exploring potential openings that may contribute further transformation of the disciplines and theories on architectural historiography and addresses the current question of the disciplinary particularity of architectural history.

An International Perspective Gangemi Editore spa

This volume, *Futurism and the Technological Imagination*, results from a conference of the International Society for the Study of European Ideas in Helsinki. It contains a number of re-written conference contributions as well as several specially commissioned essays that address various aspects of the Futurists' relationship to technology both on an ideological level and with regard to their artistic languages. In the early twentieth century, many art movements vied with each other to overhaul the aesthetic and ideological foundations of arts and

literature and to make them suitable vehicles of expression in the new Era of the Machine. Some of the most remarkable examples came from the Futurist movement, founded in 1909 by Filippo Tommaso Marinetti. By addressing the full spectrum of Futurist attitudes to science and the machine world, this collection of 14 essays offers a multifaceted account of the complex and often contradictory features of the Futurist technological imagination. The volume will appeal to anybody interested in the history of modern culture, art and literature.

The Architecture of Pica Ciamarra
Associati Gangemi Editore spa

An extensively revised and updated edition of a bestselling classic on modern architecture and its origins by Kenneth

Frampton. Kenneth Frampton's highly acclaimed survey of modern architecture and its origins has been a classic since it first appeared in 1980. Starting with the cultural developments since 1750 that drove the modern movement, moving through the creation of modern architecture, and exploring the effects of globalization and the phenomenon of international celebrity architects, this book is the definitive history of modern architecture. For this extensively revised and updated fifth edition of *Modern Architecture*, Frampton added new chapters exploring the ongoing modernist tradition in architecture while also examining the varied responses to the urgent need to build more sustainably and create structures that will withstand

changing climates. This new edition features completely redesigned interiors and an updated and expanded bibliography, making this volume more indispensable than ever.
