Kabbalah is the esoteric tradition within Judaism of things divine. It is a complete symbolic system expressing the archetypal structure of the cosmos, of society and of the individual psyche. Traditionally, only those who were mature, trained or wise were permitted to study this hidden, inner aspect of the Torah. Using the basic structure of the Tree of Life, with its fruit, the ten Sefirot or spheres of consciousness, Kabbalah reveals the patterns and correspondences of Creation, and the practices by which the

initiate can ascend through the realms to unite with the Absolute, and so serve the divine plan. Although ancient in origin, Kabbalah is alive and continuing to develop. The vast body of knowledge accumulated over the centuries has undergone many changes, adapting to different places and periods, and yet the study of psychology and the path of spirituality have always remained the core of this Hokhmah Nestorah or "Hidden Wisdom". Today in workshops and retreats the timeless wisdom of Kabbalah can be explored anew to provide meaning, growth and spiritual renewal.

Israeli Hebrew is a spoken language, 'reinvented' over the last century. It has responded to the new social and technological demands of globalization with a vigorously developing multisourced lexicon, enriched by foreign language contact. In this detailed and rigorous study, the author provides a principled classification of neologisms, their semantic fields and the roles of source languages, along with a sociolinguistic study of the attitudes of 'purists' and ordinary native speakers in the tension between linguistic creativity and the preservation of a distinct language identity.

A vast reconstruction of the knowledge of the ancient Jewish priest-scientists, with vital implications for contemporary spirituality and science. • Reveals an ancient science that used geometry, sound, and number to link the finite world of human experience with the infinite realm of the divine. • Uses teachings extending back thousands of years to explicate key concepts of quantum physics and quantum cosmology. For centuries the

Kabbalah has fascinated devotees of mysticism while its origins have remained obscure. Now, in her brilliant new work, Leonora Leet reveals that the Kabbalah was the product of a sophisticated, though largely forgotten, Hebraic sacred science that was the rival of any in Egypt or Greece. Not only does Leet reconstruct the secret teachings of the priest-scientists of the Hebrew temple, she also shows them to be the key to understanding both biblical and kabbalistic cosmology. Unlike previous purely historical explorations of the Jewish esoteric tradition, The Secret Doctrine of the Kabbalah resurrects this ancient body of knowledge to reveal eternal truths that can have a profound and positive impact on contemporary spirituality. New experimental methods of practicing Hebraic sacred science are explored that explain as never before the meaning of the central cosmological diagram of the entire Western esoteric tradition--the kabbalistic Tree of Life. Leet shows that the Kabbalah and its central diagram enshrine a key to the purpose of the cosmos, a key that has vast implications for modern physics and cosmology. In a final synthesis, she

envisions a culmination in which the universe and its divine child, perfected humanity, achieve that unification of the finite and infinite which has ever been the secret doctrine of the Kabbalah.

The hexagram was a symbol used by Jews and non-Jews from ancient times on, often as a decoration or a protective device. It became associated with Jews in 14th-century Prague, when the Jews were given their own flag (red, with a yellow Magen David), and spread through the Austrian Empire. The Zionists adopted the symbol as part of the national ensign. Pp. 97-104 deal with the Nazi use of the Magen David to mark the Jews. At first it was painted on shop windows and displayed in caricatures. The badge with the star was introduced in Poland in October 1939, and used throughout occupied Europe.

The Corpus Hermeticum is one of the primary works within the Hermetic Tradition. This Renaissance era craft is nonetheless based upon philosophical

materials from far older times, namely the third or fourth century AD, from which the primordial material came. Credited to Hermes Trismegistus, the Divine Pymander (sometimes spelled "Poemander") touches upon astronomy, science, nature, and a great deal of theological material. It is presented in the form of discourse; a format which will be familiar to anyone also familiar with Plato's "Republic" and some similar philosophical works of antiquity. Through his discourse with several individuals, Trismegistus attempts to draw upon the overarching philosophy "as above, so below." Thus then, this work describes the very process and ideation behind all of existence, the purpose of life, and the nature of good and evil, all through its treatises upon various topics.

The Antiquities of the Jews is a 20-volume historiographical work composed by Flavius Josephus in the 13th year of the reign of Roman emperor Flavius Domitian. The book contains an account of history of the Jewish people, written in Greek for Josephus' gentile patrons. In the first ten

volumes, Josephus follows the events of the historical books of the Hebrew Bible beginning with the creation of Adam and Eve. The second ten volumes continue the history of the Jewish people beyond the biblical text and up to the Jewish War. This work provides valuable background material to historians wishing to understand 1st-century AD Judaism and the early Christian period.   
 Titus Flavius Josephus was a first-century Romano-Jewish scholar, historian and hagiographer, who was born in Jerusalem—then part of Roman Judea—to a father of priestly descent and a mother who claimed royal ancestry. He initially fought against the Romans during the First Jewish–Roman War as head of Jewish forces in Galilee, until surrendering in 67 CE to Roman forces led by Vespasian after the six-week siege of Jotapata. After Vespasian became Emperor in 69 CE, he granted Josephus his freedom, at which time Josephus assumed the emperor's family name of Flavius. He fully defected to the Roman side and was granted Roman citizenship. Josephus recorded Jewish history, with special emphasis on the first century CE and the First

Jewish–Roman War, including the Siege of Masada. His most important works were *The Jewish War* (c. 75) and *Antiquities of the Jews* (c. 94).

THE MIDDLE PILLAR A Co-Relation of the Principles of Analytical Psychology and the Elementary Techniques of Magic The exercise known as the Middle Pillar was devised by the Hermetic Order of the Golden Dawn. The Art of True Healing details a powerful exercise that stimulates the body, mind, and spirit to help us create physical health and personal success. Originally published in 1932, predating by more than a half century the current interest in the mind's power to heal, this concise work guides readers through what Israel Regardie calls the Middle Pillar meditation — a technique that combines the mystical concepts of yoga's chakras and the Kabbalah's Tree of Life to create a simple and effective healing tool. In this edition, editor Marc Allen brings Regardie's work into the twenty-first century — showing us how to unleash energy to heal our bodies and, ultimately, every part of our lives. Like few books before or since, The Art of True Healing provides both the theory and practices necessary for attaining well-being and fulfillment.
