As a psychologist, Denice Jeffery helped others learn to face their greatest fears with courage and integrity. But on a dark day in 2005, she would need to learn how to apply those same support strategies to her own life. That day, she learned that she had breast cancer. Just five years later, she was told that the cancer had metastasized, spreading throughout her body. A remarkable journey began then; now, she is officially in complete remission. Here, she shares her experiences honestly and intimately. Although she had radiation, she refused chemotherapy in favor of more natural therapies. She bravely rejected her terminal diagnosis and started on a race for her very life, hoping to unearth complementary strategies that could potentially ensure her survival. In Part One, she invites you into the life of a patient who refused to accept that there was nothing to be done. In Part Two she details the strategies, supplements, and protocols she used to overcome her cancer. Her story, from diagnosis to complete remission and how she achieved that transformation, offers hope to anyone facing cancer. "Not wanting to give up and just hand over to chemotherapy, Ms Jeffery did her research and found a variety of alternatives that each had good, if largely anecdotal successes, but which made sense to her in terms of theory. She also did a voyage through her own psyche to smooth the path, and in the end, has won the day and shares it all with the reader." -Dr. Val Lewis, Noosa Heads, Queensland, Australia

Mr. Griffin marshals the evidence that cancer is a deficiency disease - like scurvy or pellagra - aggravated by the lack of an essential food compound in our modern diet. That substance is vitamin B17. In its purified form developed for cancer therapy, it is known as Laetrile. This story is not approved by orthodox medicine. The FDA, the AMA, and The American Cancer Society have labeled it fraud and quackery. Yet the evidence is clear that here, at last, is the final answer to the cancer riddle. Why has orthodox medicine waged war against this non drug approach? The author contends that the answer is to be found, not in science, but in politics - and is based upon the hidden economic and power agenda of those who dominate the medical establishment. This is the most complete and authoritative treatise available on this topic.

It is invisible, it is powerful, and it is life sustaining. It is oxygen. We inhale it every day of our lives, and while it makes up only 21 percent of the air we breathe, it is key to our very existence. The more we learn about its healing properties, the more we recognize its tremendous potential as a medical treatment for many serious disorders. Yet few have known about its important therapeutic uses—until now. In his new book, *Anti-Inflammatory Oxygen Therapy*, best-selling author Dr. Mark Sircus examines the remarkable benefits oxygen therapy offers, from detoxification to treatments for disorders such as arthritis and aging, with a special emphasis on cancer. While the term “oxygen therapy” conjures images of a crucially ill patient lying in a hospital bed with tubes strapped to his face, this book will show that oxygen can offer so much more. Dr. Sircus first looks at the nature of oxygen and its purpose in the body. He then provides an understanding of how inflammation works to destroy the body’s tissues over time, and how oxygen can reverse this process. He examines the current treatments that use hyperbaric oxygen chambers as well as newer protocols that employ this vital element. In addition, Dr. Sircus offers a simple, safe, and

highly effective fifteen-minute technique that can be used in the privacy of your home so that you can enjoy maximum benefits for a healthier life. If you are wondering why you haven’t heard about this “miracle” treatment before, the truth is that oxygen cannot be patented, it is not expensive, and you don’t have to be a specialist to use it. Without a tremendous profit behind it, it’s become a well-kept secret, but the facts speak for themselves. In this book, you will learn these life-altering facts—information that could change your health for the better.

A book about choices. A book to empower all cancer sufferers and their families. In March 2011 Laura Bond's mother Gemma was diagnosed with ovarian and uterine cancer. Laura discovered that the only thing more shocking than telling someone your mother has cancer was revealing that she had declined chemotherapy. But, according to studies, many oncologists would do the same. So Laura, a journalist, started writing a blog to explain her mother's decision to say 'no' to mainstream medicine and 'yes' to hydrogen peroxide, vitamin C injections and infrared saunas. Mum's Not Having Chemo shares Gemma's natural healing story as well as advice from over 60 of the world's leading cancer specialists and holistic healers - from oncologists in Tokyo to energy healers in Harley Street. If you want to explore alternative options, or find ways to supplement your conventional care, this book provides cutting edge research from around the world and describes treatments road-tested by Gemma and other cancer survivors. It's an invaluable and uplifting companion to help you make the best choices for your own healing journey.

New in paperback: the controversial bestseller from one of health care's most passionate and outspoken advocates that reveals what we need to know about cancer to protect ourselves, treat ourselves, and even save our lives. After losing seven members of his family to cancer over the course of a decade, Ty Bollinger set out on a global quest to learn as much as he possibly could about cancer treatments and the medical industry that surrounds the disease. As he explains in this book, there are many methods we can access to treat and prevent cancer that go well beyond chemotherapy, radiation, and surgery; we just don't know about them. Now available in paperback for the first time, *The Truth about Cancer* delves into the history of medicine--all the way back to Hippocrates's credo of "do no harm"--as well as cutting-edge research showing the efficacy of dozens of unconventional cancer treatments that are helping patients around the globe. You'll read about the politics of cancer; facts and myths about its causes; and the range of tools available to diagnose and treat it. If you're facing a cancer diagnosis right now, this book may help you and your health-care provider make choices about your next steps. If you're already undergoing conventional treatment, it may help you support your health during the course of chemo or radiation. If you're a health-care provider and want to learn all you can to help your patients, it will expand your horizons and inspire you with true stories of successful healing. And if you just want to see cancer in a new light, it will open your eyes.

During the last two decades, evidence of increasing trends of several endocrine-related disorders has been strengthened. These disorders often come with lack of uniform diagnosis and/ or even unclear endocrine disruption. The later is mainly due to abnormal classical changes in the blood-released hormone to its targeted organ, abnormal communication between cells within a tissue or organ (paracrine), within the same cell (intracrine) or signals which act on the same cell (autocrine). This challenging status drives endocrinologists to the urgent need to address enormous knowledge gaps in this wide field of research (Endocrinology). From the perspective point of view that "hormones control our bodies", we need to get these hormones rebalanced so we can restore overall health. That is simply endocrinology!

This book will explore hydrogen gas, hydrogen water, oxygen (O<sub>2</sub>), and carbon dioxide (CO<sub>2</sub>). Combining these gases will usher in a new age of medicine where the impossible becomes possible. Hydrogen is serious medicine, and so is oxygen and carbon dioxide. All three gases are nutritional and are of enormous help to people with pain, disease, and cancer. Hydrogen allows the body to function and breathe under stress. And it allows for quicker healing and recovery than when oxygen alone is used. The sicker a person is, the more they will experience the benefits of hydrogen. Hydrogen can be flooded into the body to put out the worst flames of inflammation and oxidative stress. The longer one wants to live, the more one supplements with these primary

gases. The most powerful healing/medical/anti-aging device in the world is a hydrogen oxygen inhaler.

It is estimated that 90 percent of our population is iodine deficient, and odds are most of us wouldn't think twice about it. What you don't know is that this deficiency can directly result in some terrible health problems—from cancer to heart failure to a host of other dreaded diseases. And what's even worse is that while this deficiency makes most of us highly susceptible to each of these problems, few medical professional ever bother to see if iodine deficiency is the underlying cause of these problems. What should be a red flag for diagnosing a disease may simply go undetected—and untreated. Now, bestselling health author, Dr. Mark Sircus, has written Healing With Iodine, a clear guide to understanding and recognizing this missing link to better health. Healing With Iodine is divided into three parts. Part 1 explains what iodine is, how it works in our body to maintain maximum health, and why most of us don't get enough iodine in our diet. Part 2 looks at the many current uses iodine plays in today's treatments. It also offers guidelines for finding the right iodine, and how it should be used. Part 3 looks at some of our most common health problems, including thyroid disorders, heart disease, and cancer as well as cognitive issues. It also explains how each is related to iodine deficiency, and what can be done to avoid these issues. Dr. Sircus points out that there is a growing movement in the health community to use iodine as a treatment offer, however for too many of us continue to be unaware of just how crucial iodine can to supporting our daily metabolism. Here is, in fact, a red flag that offers the type of information that we should all be aware of. And for many, it may be just the thing that helps us avoid or overcome some of these common disorders.

Basic Mechanisms to Clinical Cure Thieme

I have taken my personal experience in practice along with the details of treatment of patient

together with published literature and proposed a testable theory of breast cancer. The lack of a theory of cancer and especially breast cancer has made treatment difficult and empirical. The book is divided into four parts. The first part discusses iodine. From published facts, we can arrive at a proposal that iodine could be the first phase of a two phase cancer defence system. It appears that iodine in the extra-cellular fluid outside of the cells is the main surveillance system for abnormal cells. Iodine also triggers the natural death of normal cells in the body. There are many cells types in the body undergoing a natural death. For example some of the cells in the stomach have lives of only 2-3 days. The name of this process is apoptosis. Carefully documented descriptions of the cancer process at different places in the body reveals most cancers have similar stages through which it passes. The cancers are not really cancer until the cells start to move by invasion through the nearby connective tissue. Cells develop abnormalities for a variety of reasons and can continue to become abnormal all the way up through atypical cells and to carcinoma in situ. Carcinoma in situ is the dividing line between the two phases of cancer development. Iodine in correct doses will reverse all of the changes up to and including the carcinoma in situ. The thyroid hormone controls connective tissue function. So connective tissue around organs forms a structural biological barrier to the spread of cancer. Cancer spread to distant organs only develops in the connective tissue of those organs. Therefore, if the connective tissue defence is not strong then the cancerous cell from a distant site can land there and grow. If however the thyroid hormone level in the connective tissue is high enough then the connective tissue will perform its normal defence duties and not allow the cancer cell to enter it and develop. Using these principles, fibrocystic disease and breast cancer become more understandable. Supplemental iodine in the correct doses will remove all lesions from carcinoma in situ back to just an abnormal cell by triggering death of these cells by apoptosis. Spread of cancer cells in the connective tissue can be arrested by adequate treatment with thyroid hormone to strengthen the connective tissue barrier. My experience with patients using this approach so far has been successful. The principles are that there are two phases to cancer one controlled by iodine and the other by thyroid hormone. Thus the book deals with the prevention and survival of breast cancer.
