Lo c Wacquant's  
writings have shaken  
the world of  
criminology--and social  
science more  
generally--to their  
foundations with a  
wide-ranging critique  
of neoliberal  
governance's approach  
to crime and poverty  
and its reorientation of  
state power from  
welfare to discipline.  
The first book to fully  
engage with  
Wacquant's work,  
Criminalisation and  
Advanced Marginality  
presents critical but  
constructive essays on  
his challenging ideas,

focusing on the  
governance of crime  
and disorder, welfare,  
and "diswelfare." It  
concludes with  
Wacquant's responses  
to the authors'  
comments and  
critiques.

This book gives a social anthropological account of whaling culture in Japan. When originally published this was the first comprehensive account in English of the history of Japanese whaling, showing how it has given rise to a particular culture. The volume discusses what happens when that culture is threatened.

At the same time as explaining the work organization of those involved in whaling, the role of whaling companies in local and national economies, and the role of the whale in the establishment and

maintenance of local community identity (ritual, food, gift-giving), the authors address the wider political and so-called "environmental" issues surrounding whaling in general, and Japanese whaling in particular.

This book pays homage to Neil Smith's ideas, offering a critical approach and rich collection of insights that draw on Smith's work for inspiration and debate. With interdisciplinary and international contributions from leading experts, the book demonstrates the impact of Smith's ideas on understanding the role of urbanisation in general and gentrification, in particular, in contemporary society. The book demonstrates how gentrification varies significantly from city to city, across different cultural and political-economic

regimes, and in terms of the timing of urban transformations. This collection provides a forum for debate for those working in urban regeneration and citizenship, and those directly affected by the processes and problems arising from gentrification. It will be of interest to students and scholars in urban geography, urban sociology, cultural studies, and wider social and urban theories.

The James Study Set provides the home study component of

James: Pearls for Wise Living. Its ten lessons take you through the Letter of James verse by verse, drawing on pertinent passages from the Bible and Catechism of the Catholic Church to help you understand what you are reading and how to apply it to your life. Group discussion of the questions reinforces the lesson, while the suggested responses provide additional insights and explanations. Each lesson should be concluded with the corresponding presentation from the DVD or CD series, which contains expert commentary presented by Jeff Cavins.

E-logistics serves as the nerve system for the whole supply chain

and enables smooth information flow within and between organizations. This contributed book focuses on the strategic role of e-logistics in today's dynamic global environment. In E-Logistics international experts from both academia and industry examine how competitiveness and productivity in transport, logistics and supply chain management can be improved using e-logistics systems and technologies. A variety of successful e-logistics business approaches are discussed covering a range of commercial sectors and transport modes. Separate chapters consider e-logistics developments for air freight; rail freight; road freight;

sea transport and port systems. Subsequent chapters address in depth support systems for B2C and B2B e-commerce and e-fulfilment, warehouse management, RFID, electronic marketplaces, global supply network visibility, and service chain automation. Industry case studies are used to support the discussion. The book also investigates emerging technologies in e-logistics and considers what the future might hold in this rapidly changing and developing field. *Basic Study Manual* John Wiley & Sons Beginning in 1983/84 published in 3 vols., with expansion to 6 vols. by 2007/2008: vol. 1--Organization descriptions and cross references; vol. 2--

Semantics will play an important role in the future development of software systems and domain-specific languages. This book provides a needed introductory presentation of the fundamental ideas behind these approaches, stresses their relationship by

formulating and proving the relevant theorems, and illustrates the applications of semantics in computer science. Historically important application areas are presented together with some exciting potential applications. The text investigates the relationship between various methods and describes some of the main ideas used, illustrating these by means of interesting applications. The book provides a rigorous introduction to the main approaches to formal semantics of programming languages.

This report on the government fund to support private sector jobs and growth in

places that rely on the public sector, the Regional Growth Fund, finds that the initial £1.4 billion investment could result in some 41,000 more full-time-equivalent private sector jobs in the economy than without the Fund. However, there was scope to have generated more jobs relative to the amount of grant awarded. The Fund has not optimised value for money because a significant proportion of the funds were allocated to projects that offer relatively few jobs for the money invested. The report concludes that applying tighter controls over the value for money offered by individual bids and then allocating funding across more bidding rounds could have

created thousands more jobs from the same resources. Rigorous evaluation will be required to quantify precisely the Fund's overall employment impact. More than two thirds (28,000) of the 41,000 additional jobs are expected to be delivered indirectly, for example through knock-on effects in companies' supply chains or the wider economy. The average project will last at least seven years. However, it is not clear how much of the Fund's boost to the private sector will be sustained in the longer term. It has also taken longer than expected to turn conditional offers of grants for projects into final offers. Therefore, despite the government's intention

to get projects up and running quickly, only around a third have so far received final offers of funding

This is the first book to set out a full range of research strategies for evaluating the clinical practice of acupuncture. Leading acupuncturists and researchers with international reputations share their expertise. They illustrate their descriptions with practical examples of what has worked and what has not. It outlines many of the key challenges in the field. These challenges relate to the nature of acupuncture and the gap between current research evidence and the actual experiences of acupuncturists in the field. By focusing the chapters on key research questions, rather than methods,

the book has a user-friendly feel. Each chapter is easily accessible with brief explanations of research designs as well as vignettes of relevant past research. The book is based on a deep understanding of acupuncture, with its inherent complexity in practice, whether based on traditional principles or more modern concepts. By incorporating a more sophisticated understanding of the field, this book details a range of strategies aiming to develop the evidence base with the utmost rigour. It is the first book on acupuncture research to take this unique view, integrating the very best of evidence-based medicine with a genuine sensitivity to the discipline of

acupuncture, from its traditional and holistic roots to its more modern interpretations.

With the introduction of the 2030 Agenda for Sustainable Development by the United Nations General Assembly in 25 September 2015, UN agencies, member states and stakeholders have begun to focus on the adoption and implementation of these strategies in realization of 17 Sustainable Development Goals. To work toward sustainability, strategic measures to encourage stakeholders to contribute to the goals of the 2030 agenda are

needed. In recognition of these efforts, this book is produced to compile research concepts and approaches for the area of sustainability management of industry, technology development, community, education and the environment. The objective of this book is to deliberate concepts and approaches of sustainability management taking place in Malaysia whereby case studies will be revealed to

provide way forward of sustainability management toward achieving sustainable development. The insights provided can be applied to advanced and developing countries by sustainable development practitioners, encompassing government agencies, academia, industries, NGOs and community, who would like to adopt the concept of approach of sustainability into their area of management.
