Minerals Yearbook Routledge

This book is designed to introduce doctoral and graduate students to the process of scientific research in the social sciences, business, education, public health, and related disciplines.

Handbook of Psychological Assessment in Primary Care Settings Rowman & Littlefield

"Covers Adobe Bridge and Camera Raw!"--cover.

Social Science Research Routledge

The United States has by far the world's largest population of incarcerated people. More than a million Americans are imprisoned; hundreds of thousands more are held in jails. This vast system has doled out punishment—particularly to people from marginalized groups—on an unfathomable scale. At the same time, it has manifestly failed to secure public safety, instead perpetuating inequalities and recidivism. Why does the United States see punishment as the main response to social harm, and what are the alternatives? This book brings together essays by scholars, practitioners, activists, and writers, including incarcerated and formerly incarcerated people, to explore the harms of this punitive approach. The chapters address a range of issues, from policing to prosecution, and from how people are treated in prison to the consequences of a criminal conviction. Together, they consider a common theme: We cannot reduce our dependence on mass incarceration until we confront our impulse to punish in ways that are excessive, often wildly disproportionate to the harm caused. Essays trace how a maze of local, state, and federal agencies have contributed to mass incarceration and deterred attempts at reform. They shed light on how the excesses of America's criminal legal system are entwined with poverty, racism, and the legacy of slavery. A wide-ranging and powerful look at the failures of the status quo, Excessive Punishment also considers how to reimagine the justice system to support restoration instead of retribution.

Arbitration's Age of Enlightenment? Manchester University Press

This book presents the current state of the art regarding the application of logical tools to the problems of theory and practice of lawmaking. It shows how contemporary logic may be useful in the analysis of legislation, legislative drafting and legal reasoning concerning different contexts of law making. Elaborations of the process of law making have variously emphasised its political, social or economic aspects. Yet despite strong interest in logical analyses of law, questions remains about the role of logical tools in law making. This volume attempts to bridge that gap, or at least to narrow it, drawing together some important research problems—and some possible solutions—as seen through the work of leading contemporary academics. The volume encompasses 20 chapters written by authors from 16 countries and it presents diversified views on the understanding of logic (from strict mathematical approaches to the informal, argumentative ones) and differentiated choices concerning the aspects of law making taken into account. The book presents a broad set of perspectives, insights and results into the emerging field of research devoted to the logical analysis of the area of creation of law. How does logic inform lawmaking? Are legal systems consistent and complete? How can legal rules be represented by means of formal calculi and visualization techniques? Does the structure of statutes or of legal systems resemble the structure of deductive systems? What are the logical relations between the basic concepts of jurisprudence that constitute the system of law? How are theories of legal interpretation relevant to the process of legislation? How might the statutory text be analysed by means of contemporary computer programs? These and other questions, ranging from the theoretical to the immediately practical, are addressed in this definitive collection.

The purpose of this book seeks to examine the leadership of the Black church through a critical and theoretical lens utilizing historical and anthropological foci to better identify and understand some of the challenges within the paramount institution and its attrition to the Black American community at large and provide appropriate suggestions and generating frameworks for addressing the challenges. The church has always played a pivotal role in Black American culture's identity, development, and progression. Leadership and organizational challenges within the church pervasively matriculate to other Black spaces, historically Black organizations, and a broader societal context. Due to the church's historical and ethnographic context for Blacks in America, many of the challenges faced in the church go unrecognized, unspoken, thus unattended. This manuscript endeavors to identify the challenges, and flaws through research and data, to provide solutions through practical and theoretical implementations to some shortcomings for the betterment of the church and culture. The interconnectedness of culture and religion for Blacks in America established a gargantuan impact factor on the church and its leaders. This manuscript examines the pervading effects of the influence through leadership dispensation. It also explores the understanding of leadership through the lens of Black Christianity, deriving that the foundation of leadership in the Black community was primarily circumscribed by the influence of the church as conglomerate collectivism of almost five hundred years of the history and culture of Africans, African descendants, and members of the African diaspora in what is now America who contributed to the ideal of the Black church. The critical analysis provided is not one of condemnation but likened to a vital performance review through member experiences barred against applicable leadership and organizational development barometers.

The Medical-Pharmaceutical Killing Machine Fulton Books, Inc.

Just after midnight on 22 April 1916 on the Western Front, a sergeant from the 15th (1st London) Royal Welsh Fusiliers came sliding and stumbling along the dark, mud-filled trench towards the four men, huddled together and soaked-through, in the shallow dugout. He was clutching his postbag in which there were four parcels for one of them, William McCrae, whose twentieth birthday fell on this day. A hand-written account by William, my grandfather, was found in my mother's papers, long after his death. This book describes a year of his time fighting in the First World War, from December 1915 to December 1916. Two months after his birthday, he was marching towards the Somme, where he was to act as a runner during the key Welsh engagement in the Battle of Mametz Wood. Later, he went on to volunteer and train as a sniper. He continued in this role for over a year, becoming a lance corporal in the 38th Divisional Sniping Company while fighting on the Ypres Salient. His words emphasise the key role snipers played in the collecting of intelligence about the enemy, through close observation and careful reporting. His account stops abruptly in mid-sentence, just at the point where he indicates he is about to reveal more to us about ‘a new, interesting part of the line to be manned by us Snipers’. Piecing together clues from his sketches, maps and photos,

and this book paints a picture of Williams' time during the rest of the war. In 1917 he returned to England to train as a temporary officer in the 18th Officer Cadet Battalion at Prior Park, Bath. He came back to the Western Front as a 2nd Lieutenant in the Duke of Wellington's (West Riding) Regiment, where he was seconded to the 1/5 Lancashire Fusiliers until the end of the war. During this time, it is likely that his interest and experience as a sniper continued, with evidence that he may have taught at one of the Sniping Schools set up across France.

The Lord's Supper (or Eucharist) has often been a subject of intense debate in the church. What is often lost in this debate is the significance of the relationship of the Eucharist to Jesus' Last Supper with his disciples, which was a Passover--or Passover-like--meal. Moreover, the Last Supper connects back to various meals in Jesus' earthly ministry. And it looks forward to the great messianic banquet as fulfillment of Jewish expectations. In exploring these connections, this book focuses on the three motifs of "new creation," "hospitality," and "hope" in Christ. Most significantly, when we break the bread and drink the wine (or juice) together we are asserting the reality of the new creation in Christ, affirming God's grace, forgiveness, and cruciform love which is to be embodied in the Christian community, and anticipating the day when God's present and ongoing work of restoration, justice, and reconciliation will ultimately prevail. The Supper, then, is basically a condensed summary of the story of God's plan of redemption. Hesselgrave brings together biblical, theological, ethical, and social insights in a way that deepens our understanding of the meaning and practical significance of biblical texts related to this central ordinance of the church.

Unveiling Whiteness in the Twenty-First Century Univ of California Press

Nanosatellites: Space and Ground Technologies, Operations and Economics Rogerio Atem de Carvalho, Instituto Federal Fluminense, Brazil Jaime Estela, Spectrum Aerospace Group, Germany and Peru Martin Langer, Technical University of Munich, Germany Covering the latest research on nanosatellites Nanosatellites: Space and Ground Technologies, Operations and Economics comprehensively presents the latest research on the fast-developing area of nanosatellites. Divided into three distinct sections, the book begins with a brief history of nanosatellites and introduces nanosatellites technologies and payloads, also explaining how these are deployed into space. The second section provides an overview of the ground segment and operations, and the third section focuses on the regulations, policies, economics, and future trends. Key features: Payloads for nanosatellites Nanosatellites components design Examines the cost of development of nanosatellites. Covers the latest policies and regulations. Considers future trends for nanosatellites. Nanosatellites: Space and Ground Technologies, Operations and Economics is a comprehensive reference for researchers and practitioners working with nanosatellites in the aerospace industry. Personalities on the Plate Bloomsbury Publishing USA

A cooperative publication of the National Association for Gifted Children and Prufrock Press, Serving Gifted Students in Rural Settings provides a framework for educating the gifted in rural settings. The book outlines practical, theoretical, and evidence-supported approaches for understanding, teaching, and leading programs for this unique population. Case study vignettes and practical ideas for administrators and teachers are combined with theoretical applications. The first of three sections in the book outlines the various philosophies and current status of rural education. The second section focuses on practical strategies and evidence-supported approaches for identifying and serving rural gifted students based on their unique geography. Section three highlights support structures that are necessary for leading and supporting gifted education in rural schools. This book helps bridge the gap existing between rural education and accessible, effective gifted education. Information Compliance IAP

In this highly original and personal book, Ruben J. Garcia argues forcefully that we must center the minimum wage as a tool for fighting structural racism. Employing the lessons of critical race theory to show how low minimum wages and underenforcement of workplace laws have always been features of our racially stratified society, Garcia explains why we must follow the leadership of social movements by treating increases in minimum wage levels and enforcement as matters of racial justice. Offering solutions that would benefit all workers, especially the immigrants and people of color most often made victims of wage theft, Critical Wage Theory is essential reading for anyone who seeks a more just future for the working class.

The Supper Cambridge University Press

Of the all the people surrounding the assassination of President Kennedy, few are more mysterious and enigmatic than David William Ferrie of New Orleans. Author Judyth Vary Baker knew David Ferrie personally and worked with him in a covert project in New Orleans during the summer of 1963, and this book examines his strange and puzzling behavior both before and after the assassination. At the time of the assassination, Ferrie was a 45-year-old New Orleans resident who was acquainted with some of the most notorious names linked to the assassination: Lee Oswald, Clay Shaw, Guy Banister, Jack Ruby, and Carlos Marcello. He possessed assorted talents and eccentricities: he was at one time a senior pilot with Eastern Airlines until he was fired for homosexual activity on the job; he was also a hypnotist; a serious researcher of the origins of cancer; an amateur psychologist; and a victim of a strange disease, alopecia, which made all of his body void of hair. His odd lifestyle was embellished with an equally bizarre appearance featuring a red toupee and false eyebrows. This is the first book focused solely on David Ferrie and his alleged involvement in the conspiracy to assassinate President John F. Kennedy.

The Russia Sanctions Simon and Schuster

Directly presenting the considered views of a broad cross-section of the international arbitration community, this timely collection of essays addresses the criticism of the arbitral process that has been voiced in recent years, interpreting the challenge as an invitation to enlightenment. The volume records the entire proceedings of the twenty-fifth Congress of the International Council for Commercial Arbitration (ICCA), held in Edinburgh in September 2022. Topics range from the impact of artificial intelligence to the role of international arbitration in restraining resort to unilateralism, protectionism, and nationalism. The contributors tackle such contentious issues as the following: time and cost; gender and cultural diversity; confidentiality vs. transparency; investor-State dispute settlement procedures; the proposed establishment of a permanent international investment court system; how cross-fertilisation across different disciplines may impact international arbitration; determining whether a document request seeks documents that are relevant and material to the

outcome of a dispute; whether we would be better off if investment arbitration were to disappear; and implications for international arbitration of the Russian invasion of Ukraine. There is consideration of global issues that are likely to give rise to disputes in the future, including climate change, environmental protection, access to depleting water resources, energy and mining transition, and human rights initiatives. Several contributions focus on developments in specific countries (China, India) and regions (Africa, the Middle East). Arbitrators, corporate counsel, and policymakers will appreciate this opportunity to engage with current thinking on key issues in international commercial and investment arbitration, especially given the diversity of thought presented by authors from all over the world.

In recent years, scientific advances in our understanding of animal minds have led to major changes in how we think about, and treat, animals in zoos and aquariums. The general public, it seems, is slowly coming to understand that animals like apes, elephants, and dolphins have not just brains, but complicated inner and social lives, and that we need to act accordingly. Yet that realization hasn't yet made its presence felt to any great degree in our most intimate relationship with animals: at the dinner table. Sure, there are vegetarians and vegans all over, but at the same time, meat consumption is up, and meat remains a central part of the culinary and dining experience for the majority of people in the developed world. With *Personalities on the Plate*, Barbara King asks us to think hard about our meat eating--and how we might reduce it. But this isn't a polemic intended to convert readers to veganism. What she is interested in is why we've not drawn food animals into our concern and just what we do know about the minds and lives of chickens, cows, octopuses, fish, and more. Rooted in the latest science, and built on a mix of firsthand experience (including entomophagy, which, yes, is what you think it is) and close engagement with the work of scientists, farmers, vets, and chefs, *Personalities on the Plate* is an unforgettable journey through the world of animals we eat. Knowing what we know--and what we may yet learn--what is the proper ethical stance toward eating meat? What are the consequences for the planet? How can we live an ethically and ecologically sound life through our food choices? We could have no better guide to these fascinatingly thorny questions than King, whose deep empathy embraces human and animal alike. Readers will be moved, provoked, and changed by this powerful book.

The Black American Church St. Helena Press

Protect business value, stay compliant with global regulations, and meet stakeholder demands with this privacy how-to Privacy, Regulations, and Cybersecurity: The Essential Business Guide is your guide to understanding what "privacy" really means in a corporate environment: how privacy is different from cybersecurity, why privacy is essential for your business, and how to build privacy protections into your overall cybersecurity plan. First, author Chris Moschovitis walks you through our evolving definitions of privacy, from the ancient world all the way to the General Law on Data Protection (GDPR). He then explains—in friendly, accessible language—how to orient your preexisting cybersecurity program toward privacy, and how to make sure your systems are compliant with current regulations. This book—a sequel to Moschovitis' well-received Cybersecurity Program Development for Business—explains which regulations apply in which regions, how they relate to the end goal of privacy, and how to build privacy into both new and existing cybersecurity programs. Keeping up with swiftly changing technology and business landscapes is no easy task. Moschovitis provides down-to-earth, actionable advice on how to avoid dangerous privacy leaks and protect your valuable data assets. Learn how to design your cybersecurity program with privacy in mind Apply lessons from the GDPR and other landmark laws Remain compliant and even get ahead of the curve, as privacy grows from a buzzword to a business must Learn how to protect what's of value to your company and your stakeholders, regardless of business size or industry Understand privacy regulations from a business standpoint, including which regulations apply and what they require Think through what privacy protections will mean in the post-COVID environment Whether you're new to cybersecurity or already have the fundamentals, this book will help you design and build a privacy-centric, regulation-compliant cybersecurity program.

The shifting border: Legal cartographies of migration and mobility WIT Press

"It's the statehouses, stupid." *Laboratories of Autocracy* shows that far more than the high-profile antics of politicians like Marjorie Taylor Greene or Jim Jordan—and yes, even bigger than Donald Trump's "Big Lie"—it's anonymous, often corrupt politicians in statehouses across the country who pose the greatest dangers to American democracy. Because these statehouses no longer operate as functioning democracies, these unknown politicians have all the incentive to keep doing greater damage, and can not be held accountable however extreme they get. This has driven steep declines in states like Ohio and others across the country. And collectively, it's placed American democracy in its greatest peril since the dawn of the Jim Crow era. But Pepper doesn't stop there. He lays out a robust pro-democracy agenda outlining how everyone from elected officials to business leaders to everyday citizens can fight back.

Photoshop CC 2014 Release Chelsea Green Publishing

This collection immerses scholars of communication and related disciplines in narratives of and conversations about social-justice-focused activism. Through autoethnographic essays, *Mindful Activism* chronicles the authors' experiences as activist academics challenging and seeking to remedy injustices on campus and in local and global communities. Those experiences range from engaging in a single activist act to collaborating over many years with oppressed communities and social change groups. Building upon communication activism research and following a liberation-based transformative learning model, the book shows both activism in action and deep reflection on that activism. The authors re-experience activist experiences, draw out lessons, and invite readers to apply those to their own social justice endeavors. *Mindful Activism* also demonstrates how mindfulness supports activists in deepening their awareness and understanding of themselves, others, and social systems. This orientation increases the likelihood that activists will remain grounded enough to respond to injustice mindfully/effectively. The book will enrich courses on activism, social justice, dialogue, narrative inquiry, qualitative methods, autoethnography, and general graduate studies, and will resonate with scholars committed to building a more equitable and just world.

Sniper on the Ypres Salient Routledge

eGirls, eCitizens is a landmark work that explores the many forces that shape girls' and young women's experiences of privacy, identity, and equality in our digitally networked society. Drawing on the multi-disciplinary expertise of a remarkable team of leading Canadian and international scholars, as well as Canada's foremost digital literacy organization, MediaSmarts, this collection presents the complex realities of digitized communications for girls and young women as revealed through the findings of The eGirls Project (www.egirlsproject.ca) and other important research initiatives. Aimed at moving dialogues on scholarship and policy around girls and technology away from established binaries of good vs bad, or risk vs opportunity, these seminal contributions explore the interplay of factors that shape online environments characterized by a gendered gaze and too often punctuated by sexualized violence. Perhaps most importantly, this collection offers first-hand perspectives collected from girls and young women themselves, providing a unique window on what it is to be a girl in today's digitized society. Published in English.

Water Studies John Wiley & Sons

How much does money really matter in American politics? A first-of-its-kind reference book, this encyclopedia provides the most up-to-date research and analysis regarding how money affects American campaigns, elections, politics, and public policy. Some Americans have come to the conclusion that U.S. politics is dominated by money, that politicians are frequently if not routinely "bought and paid for," and that the only entities who wield political power are America's monied "elite" or powerful special interests like "big labor" or "Wall Street." But other American citizens believe that proposals to limit the influence of money in politics run counter to the free speech principles enshrined in the Constitution. This book will explore this compelling and controversial issue, examining where money in American politics comes from, where it goes, and the impact of all of those millions of dollars on American society. The entries objectively cover a breadth of major issues, organizations, individuals, court cases, and controversies surrounding the role of money in American politics, especially into the most recent events of the 21st century. Commentary by leading experts and scholars on American politics assess different aspects of how money is used for political purposes. The book explains the current state of knowledge about money in politics, including whether contributions and expenditures should be regulated; if so, how; and whether it even matters in terms of impact. While intended and written primarily for students at the high school and undergraduate levels, *Money in American Politics: An Encyclopedia* will also be of interest to general readers and experts looking to better understand how money affects campaigns, elections, and the making of law and policy in the United States.

Money in American Politics Pearson Education

The Handbook on Pretrial Justice covers the front end of the criminal legal system from pretrial diversion to pretrial detention or release. Often overlooked, the decisions made at the earliest phases of the criminal legal system have huge implications for defendants and their families, the community, and the system itself, and impact the entire criminal legal system. This collection of essays and reports of original research explores the complexities of pretrial decisions and practices and includes chapters in the following broad areas: the consequences of detention, pretrial decision-making, community supervision, and risk assessment. The book also includes a section looking at pretrial justice outside of the U.S. Each chapter summarizes what is known, identifies the gaps in the research, and discusses the theoretical, empirical, and policy implications of the research findings. This is Volume 6 of the American Society of Criminology's Division on Corrections and Sentencing handbook series. The handbooks provide in-depth coverage of seminal and topical issues around sentencing and correction for scholars, students, practitioners, and policymakers.
