In the West we tend to think of witches in terms of the witch trials, when fear, ignorance and religious fervour brought the poor to heel, and fostered suspicion of those who dared to be different, or knowledgeable, or independent of mind. Witches and wizards are often associated with pre-Christian societies, Celtic in particular, (and therefore popular in tales of fantasy), but the nature of their wisdom can be found in so many fascinating cultures across the world. Ancient societies, particularly where natural religions with many gods abound, often highlight the power of an elder, or a seer, a healer or a wise friend. Tales of wizards and witches reach across traditions as folk try to explain natural phenomena and engage with the world around them. Those who understood the properties of healing in plants, or could make a prediction of weather events to rescue crops, became worshipped as elders, as keepers of knowledge. In tribal African societies, Polynesian cultures and East Asian traditions there are tales of those with great knowledge who are often described as witches or wizards. The Baba Yaga of Eastern Europe, the Skinwalkers of the Navajo, Merlin and Morgana la Faye of Arthurian Legend and the fox witches of Japan are but a few of the many examples. Some work for good, others with ill-intent, but all become the focus of folkloric legend, collected here in this new book of myths and tales.

The historiographers of religious studies have written the history of this discipline primarily as a rationalization of ideological, most prominently theological and phenomenological ideas: first through the establishment of comparative, philological and sociological methods and secondly through the demand for intentional neutrality. This interpretation caused important roots in occult-esoteric traditions to be repressed. This process of "purification" (Latour) is not to be equated with the origin of the academic studies. De facto, the elimination of idealistic theories took time and only happened later. One example concerning the early entanglement is Tibetology, where many researchers and respected chair holders were influenced by theosophical ideas or were even members of the Theosophical Society. Similarly, the emergence of comparatistics cannot be understood without taking into account perennialist ideas of esoteric provenance, which hold that all religions have a common origin. In this perspective, it is not only the history of religious studies which must be revisited, but also the partial shaping of religious studies by these traditions, insofar as it saw itself as a counter-model to occult ideas.

The Damned (Là-bas).Joris-Karl Huysmans.The Damned (Là-bas) By Joris-Karl Huysmans Charles-Marie-Georges Huysmans (February 5, 1848 - May 12, 1907) was a French novelist who published his works as Joris-Karl Huysmans; he is most famous for the novel À rebours. His style is remarkable for its idiosyncratic use of the French language, wide-ranging vocabulary, wealth of detailed and sensuous description, and biting, satirical wit. The novels are also noteworthy for their encyclopaedic documentation, ranging from the catalogue of decadent Latin authors in À rebours to the discussion of the symbology of Christian architecture in La Cathédrale. Huysmans' work expresses a disgust with modern life and a deep pessimism, which led the author first to the philosophy of Arthur Schopenhauer then to the teachings of the Catholic Church.
