DEANDRE SHAFFER

The Document Within the Walls Voyage Press

Was Socrates an ironist? Did he mock his interlocutors and, in doing so, show disdain for both them and the institutions of Athenian democracy? These questions were debated with great seriousness by generations of ancient Greek writers and helped to define a primary strand of the western tradition of political thought. By reconstructing these debates, *The Politics of Socratic Humor* compares the very different interpretations of Socrates developed by his followers—including such diverse thinkers as Plato, Aristotle, Xenophon, Aristophanes, and the Hellenistic philosophers—to explore the deep ethical and political dimensions of Socratic humor and its implications for civic identity, democratic speech, and political cooperation. Irony has long been seen as one of Socrates' most characteristic features, but as Lombardini shows, irony is only one part of a much larger toolkit of Socratic humor, the broader intellectual context

of which must be better understood if we are to appropriate Socratic thought for our own modern ends.

Senate Documents, Otherwise Publ. as Public Documents and Executive Documents Cambridge University Press
Specialists in the music and musical institutions of Venice examine the life and analyze the music of Sirmen (1745-1818), who until recently was regarded mainly as a violin pupil of Tartini and the recipient of a letter from him explaining his teaching methods, how to practice, and how to create beautiful sounds from the instrument. Baldauf-Berdes collected most of the documentary evidence for the study, and Elsie did most of the actual writing. Annotation copyrighted by Book News, Inc., Portland, OR.

Giorgio Bassani is an Italian-Jewish writer from Ferrara, famous largely for 'The Garden of the Finzi-Contini', 'The Golden-Rimmed Eye Glasses' and other novels, brought together in 'Il Romanzo di Ferrara' (1980). In this monumental work, Bassani describes the life of the

Italian Jews under Fascism. Bassani may be seen as not just a fictional writer, but as a witness of persecution of Jews under Fascism; his 'Romance' is not so much a novel but a multifaceted document on Jewish life in the peninsular. This volume takes into account a close reading of Bassani, literary theories on witnessing the Shoa, and the historical debate on Italian discriminatory politics. The book is thus both literary criticism and an analysis of anti-Semitism and Jewish assimilation in Italy.

Guide to Technical Documents

Springer

An invaluable guide to the available historical source material on playing the violin and viola.

[Why Generalists Triumph in a Specialized World](#) Univ of California Press

A highly illustrated biography and study of Stradivari, the greatest violin maker, including colour photographs of his most famous instruments.

The #1 New York Times bestseller that has all America talking—with a new afterword on expanding your range—as seen on CNN's Fareed Zakaria GPS, Morning Joe, CBS This Morning, and more. "The most important business—and parenting—book of the year." —Forbes "Urgent and important. . . an essential read for bosses, parents, coaches, and anyone who cares about improving performance." —Daniel H. Pink Shortlisted for the Financial Times/McKinsey Business Book of the Year Award Plenty of experts argue that anyone who wants to develop a skill,

play an instrument, or lead their field should start early, focus intensely, and rack up as many hours of deliberate practice as possible. If you dabble or delay, you'll never catch up to the people who got a head start. But a closer look at research on the world's top performers, from professional athletes to Nobel laureates, shows that early specialization is the exception, not the rule. David Epstein examined the world's most successful athletes, artists, musicians, inventors, forecasters and scientists. He discovered that in most fields—especially those that are complex and unpredictable—generalists, not specialists, are primed to excel. Generalists often find their path late, and they juggle many interests rather than focusing on one. They're also more creative, more agile, and able to make connections their more specialized peers can't see. Provocative, rigorous, and engrossing, Range makes a compelling case for actively cultivating inefficiency. Failing a test is the best way to learn. Frequent quitters end up with the most fulfilling careers. The most impactful inventors cross domains rather than deepening their knowledge in a single area. As experts silo themselves further while computers master more of the skills once reserved for highly focused humans, people who think broadly and embrace diverse experiences and perspectives will increasingly thrive.

The R. O. T. C. Manual Troubador Publishing Ltd

This book offers fascinating insights into the key technical and scientific developments in the history of radar, from the first patent, taken out by Hülsmeyer in 1904, through to the present day. Landmark events are highlighted and fascinating insights provided into the exceptional people who made possible the progress in the field, including the scientists and technologists who worked independently and under strict secrecy in various countries across the world in the 1930s and the big businessmen who played an important role after World War II. The book encourages multiple levels of reading. The author is a leading radar researcher who is ideally placed to offer a technical/scientific perspective as well as a historical one. He has taken care to structure and write the book in such a way as to appeal to both non-specialists and experts. The book is not sponsored by any company or body, either formally or informally, and is therefore entirely unbiased. The text is enriched by approximately three hundred images, most of which are original and have been accessed by detailed searches in the archives.

100 Years of Radar

Seeing is Understanding. The first VISUAL guide to marine diesel systems on recreational boats. Step-by-step instructions in clear, simple drawings explain how to maintain, winterize and

recommission all parts of the system - fuel deck fill - engine - batteries - transmission - stern gland - propeller. Book one of a new series. Canadian author is a sailor and marine mechanic cruising aboard his 36-foot steel-hulled Chevrier sloop. Illustrations: 300+ drawings Pages: 222 pages Published: 2017 Format: softcover Category: Inboards, Gas & Diesel
