power today. This book explores the nature of communist regimes-what they share in common, how they differed from each other, and how they differentially evolved over time. It finds that these regimes all came to power in the context of warfare or its aftermath, followed by the consolidation of power by a revolutionary elite that came to value "revolutionary violence" as the preferred

means to an end, based upon Marx's vision of apocalyptic revolution and Lenin's conception of party organization. All these regimes went on to "build socialism" according to a Stalinist template, and were initially dedicated to "anti-imperialist struggle" as members of a "world communist movement." But their common features gave way to diversity, difference and

defiance after the death of Joseph Stalin in 1953. For many reasons, and in many ways, those differences soon blew apart the world communist movement. They eventually led to the collapse of European communism. The remains of communism in China, Vietnam, Laos, North Korea, and Cuba were made possible by the first three transforming their economic systems, opening to the

capitalist international order, and abandoning "anti-imperialist struggle." North Korea and Cuba have hung on due to the elites avoiding splits visible to the public. Analytically, the book explores, throughout, the interaction among the internal features of communist regimes (ideology and organization), the interactions among them within the world communist

movement, and the interaction of communist states with the broader international order of capitalist powers"--

"Ancient Empires is a relatively brief yet comprehensive and even-handed overview of the ancient Near East, the Mediterranean, and Europe, including the Greco-Roman world, Late Antiquity, and the early

Muslin period. The book emphasizes the central, if problematic, connection between political and ideological power in both empire-formation and resistance. By defining the ancient world as a period stretching from the Bronze Age into the early Muslim world, it is broader in scope than competing books; yet at the same time its tight thematic concentration keeps the narrative engagingly

focused"--

The eighteenth century was a crucial era in modern Iranian history, but up to now it has been little studied outside Iran. In *Crisis, Collapse, Militarism and Civil War*, Michael Axworthy has gathered leading experts on this period from around the world to provide a multifaceted account of this fascinating,

dramatic, and turbulent era. The volume covers economics, intellectual history, military developments, politics, and the visual arts. In the 1720s, after the collapse of Safavid rule in 1722, it seemed that Iran might disappear altogether, partitioned between her neighbors. Within a few years the country surged back to make a bid for regional dominance under Nader Shah, but

lapsed again into civil war after his untimely death in 1747. The civil wars lasted almost until the end of the century, albeit with an interlude of relative calm and good governance under Karim Khan Zand, who ruled from the mid-1750s until his death in 1779. In 1796, after more civil wars, Agha Mohammad Shah had himself crowned as the first monarch of the Qajar dynasty,

which lasted until 1925. This formative period is vital for understanding modern and contemporary Iran, and it is a fascinating drama of events and personalities in its own right. It was a period of crisis and turmoil, but also a period of possibility and creativity in ways that have for the most part been forgotten. Until now, scholarship on the significance of the eighteenth century in Iran

has been scant and often obscure. This volume will not only change that, but it will also reshape our understanding of the history of one of the most important and influential states in the Middle East. *Glencoe World History, Student Edition* Author House Fascinating philosophical inquiry into post-Holocaust representations of the event in political theory, ethics, and aesthetics,

and an assessment of the limitations and promise of philosophical 'witnessing' in relation to those issues *A Humanist Science* McGraw-Hill Education Providing a capstone to Philip Selznick's influential body of scholarly work, *A Humanist Science* insightfully brings to light the value-centered nature of the social sciences. The work clearly challenges the

supposed separation of fact and value, and argues that human values belong to the world of fact and are the source of the ideals that govern social and political institutions. By demonstrating the close connection between the social sciences and the humanities, Selznick reveals how the methods of the social sciences highlight and enrich the study of such values as well-

being, prosperity, rationality, and self-government. The book moves from the animating principles that make up the humanist tradition to the values that are central to the social sciences, analyzing the core teachings of these disciplines with respect to the moral issues at stake. Throughout the work, Selznick calls attention to the conditions that affect the emergence,

realization, and decline of human values, offering a valuable resource for scholars and students of law, sociology, political science, and philosophy. Combining rigorous academic scholarship with the experience of a senior Pentagon policymaker, Mara E. Karlin explores the

key national security issue of our time: how to effectively build partner militaries. Given the complex and complicated global security environment, declining U.S. defense budgets, and an increasingly connected (and often unstable) world, the United States has an ever-deepening interest in strengthening fragile states. Particularly since World War II, it has often chosen to do so by

strengthening partner militaries. It will continue to do so, Karlin predicts, given U.S. sensitivity to casualties, a constrained fiscal environment, the nature of modern nationalism, increasing transnational security threats, the proliferation of fragile states, and limits on U.S. public support for military interventions. However, its record of success is thin. While most analyses of these

programs focus on training and equipment, Building Militaries in Fragile States argues that this approach is misguided. Instead, given the nature of a fragile state, Karlin homes in on the outsized roles played by two key actors: the U.S. military and unhelpful external actors. With a rich comparative case-study approach that spans Europe, Asia, and the Middle East, Karlin unearths

provocative findings that suggest the traditional way of working with foreign militaries needs to be rethought. Benefiting from the practical eye of an experienced national security official, her results-based exploration suggests new and meaningful findings for building partner militaries in fragile states. *End of History and the Last Man* Macmillan

Higher Education The origin of humans from Africa and the amazing journey of ancestors migrating to different regions of the world are illustrated. Study of archaeology and genealogy made possible to trace the path of migration. How various groups came to India and specific migrants to Kerala, India are stressed. Evolution of author's community and the role it played locally

and nationally are emphasized. The book is unique, as it explains the genesis, migration, evolution and civilization of humans who are in search of social equality. Ways of the World with Sources: For the AP® Course McGraw-Hill Education This Companion provides a wide-ranging and up-to-date overview of the conceptual issues that history as a discipline and

mode of thought gives rise to. The book offers both historical and systematic treatments of these issues, as well as addressing their contemporary relevance. Structured in three parts - Modes and Schools of Historical Thought, Epistemology and Metaphysics of History, and Issues and Challenges in Historical Theory - it offers the reader a wide scope and expert

treatment of each topic in this vibrant field that can be read in any order. An international team of experts both discuss the basis of their topic and present their own view, offering the reader a cutting-edge contribution while ensuring their chapters are of interest to both students and specialists in the field of historical theory and engaging with the very nature of historical thought, the

metaphysics of historical existence, the politics of history-writing, and the intelligibility of the historical process. The volume is an indispensable companion to the study of history and essential reading for anyone interested in the reflection on the nature of history and our historical existence.

Like the AP course it supports, Ways of the

World focuses on significant historical trends, themes, and developments in world history. Author Robert W. Strayer provides a thoughtful and insightful synthesis that helps students see the big picture. Each chapter then culminates with collections of primary sources (written and visual) organized around a particular theme, issue, or question, thus allowing students to

consider the evidence the way historians do. The second edition includes a wealth of supporting resources and supplements for the AP course, including an AP Skills Primer and AP Chapter Wrap-Ups, and rolls out Bedford/St. Martin's new digital history tools, including LearningCurve, an adaptive quizzing engine that garners over a 90% student satisfaction rate, and LaunchPad,

the all new interactive e-book and course space that puts high quality easy-to-use assessment at your fingertips. Japanese Studies from Pre-History to 1990 Springer Science & Business Media Traditions & Encounters offers an inclusive vision of the global past—one that is meaningful and appropriate for the interdependent world of contemporary times. Given the diversity of human societies, gathering and organizing the sheer mass of

information in a meaningful way is a daunting challenge for any world history survey course. The seven-part chronological organization enables students to understand the development of the world through time, while also exploring broader, big-picture thematic issues in world history. Through new and revised chapter-level and part-level features, the hallmark twin themes of

traditions and encounters emerge in greater clarity than ever before in this sixth edition. As a result, students have resources that enable them to move beyond the facts of history and examine the past critically, analyze causes and effects, and recognize similarities and differences across world regions and time periods. By digging deeper into the implications of world history's

stories—not just the who, the what, and the where, but also the why and the how—students can make sense of the human past. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.
