The great Christian doctrines are worth thinking through for ourselves. That's why Gordon Lewis has provided this concise and complete survey of the major truths of the Christian faith. But rather than just telling us what he has discovered in Scripture, he offers a theological workbook that helps us explore the evidence itself and to draw our own conclusions. He has organized the material around the main themes of God, Christ, the Holy Spirit, humanity, creation, the church, and the end times. This unique text has been used by students of the Bible over the last three decades in the classroom, in the home and in the church. Its enduring quality continues to make it a valuable tool for all who want to develop a systematic theology for themselves. Of Lewis's six published books, his

This book is the first comprehensive attempt to explain Ibn 'Arabî's distinctive view of time and its role in the process of creating the cosmos and its relation with the Creator. By comparing this original view with modern theories of physics and cosmology, Mohamed Haj Yousef constructs a new cosmological model that may deepen and extend our understanding of the world, while potentially solving some of the drawbacks in the current models such as the historical Zeno's paradoxes of motion and the recent Einstein-Podolsky-Rosen paradox (EPR) that underlines the discrepancies between Quantum Mechanics and Relativity.

This book aims to describe aspects of the Indonesian language as spoken by educated Jakartans in everyday interactions. This style of language is in many ways significantly different from the formal language of government and education, to the extent that it deserves separate consideration. While formal Indonesian has been the subject of a considerable amount of description very little attention has been paid to informal styles of the language. The variety described here, Colloquial Jakartan Indonesian, is the prestige variety of colloquial Indonesian and is becoming the standard informal style. The description and texts in following chapters are drawn from recordings of natural speech of educated people living in Jakarta . While the book aims to inform those with a background in linguistics the needs of teachers and learners with little or no knowledge of linguistics is always borne in mind. The work thus does not consider theoretical linguistic issues nor use technical terms which would not be readily understood by most readers.

Whereas most college-level texts may reflect a thorough (though impenetrable) mastery of the field, they tend to expect readers to plow through unnecessarily thick prose and bland design because "it's good for them." *Youth Specialties* doesn't agree. In this debut title to a continuing academic book line, college and seminary students will be introduced to real-life research, real-life youth ministry dilemmas, and real-life solutions. Contributing writers represent a spectrum of Christian Education thought and practice, as well as widespread recognition in their field...transdenominational, yet the perfect background to ministry in any denomination or ministry organization This text includes thorough indexes, design, and graphics that compel readers from page to page (now that's a first for a college text!); organization that permits professors to use any part of the text, in any order, rather than plod through the entire book from

beginning to end; a perfect primary text that gives students a rich, academic, and readable (though not "popular") grasp of every aspect of youth ministry a typical Intro course touches, while also serving as an ideal secondary text.
