Pillage of Plantations in Sri Lanka

Disha Publications
Jointly, the World Bank and the Government of Albania undertook an assessment of poverty, conducted in a qualitative manner, to gain information that could guide policy development and resource allocation. The research was conducted through a series of focus groups, interviews, and surveys that permitted community members in ten areas within Albania, to define poverty in their own terms. During the ten years of reform, Albania has been buffeted by set backs which led fully 40% of respondents to indicate that socioeconomic conditions have worsened during that period. While informal coping mechanisms have been developed in many communities, these are under stress and threaten to give way. The study suggests that a poverty reduction strategy must, at the very least, include improvements in government management, employment opportunities, provision of social services, infrastructure development, and public security.

Colombo Hilton Hotel Construction Fraud on Sri Lanka Government World Scientific
'Colombo Hilton Hotel Construction' - 'Fraud on Sri Lanka Government' - 'Sri Lanka's First Derivative Action in Law', startlingly unravels the major fraud on the Government of Sri Lanka by reputed multi-nationals, colluding with socio-politically influential, endeavouring to fraudulently 'siphon out a large scale of foreign exchange on government guarantees', which was successfully prevented through injunctions affirmed by the Supreme Court of Sri Lanka. 'On sovereign guarantees of the Government of Sri Lanka, the Colombo Hilton Hotel was to be constructed, equipped and furnished, on a 'turnkey fixed price basis' by a Japanese consortium comprising Mitsui & Co. Ltd., and Taisei Corporation, supervised and designed by Kanko Kikaku Sekkeisha Yozo Shibata & Associates, with technical assistance in planning and construction from Hilton International, United States of America, who were to operate and manage the Hotel. During construction a staged fire allegedly destroyed all plans and documents, and surreptitiously the original plans substituted, and the hotel constructed with two floors short and without the basements contrary to the original plans, based upon which Sri Lanka Government guarantees had been obtained. 'The book essentially reveals the process of litigation by one minority shareholder, single-handedly combating socio-politically powerful influential fraudulent miscreants; lucidly narratively setting out pleadings, counter-affidavits, further pleadings, interrogatories, pre-trial processes, objections, written submissions, District and Appeal Court orders, and the landmark historic judgment by the Supreme Court of Sri Lanka, demonstrating its independence in pronouncing - 'in the given circumstances the Government could not be indifferent', - resulting in the Japanese multi-nationals writing-off a colossal sum of US \$ 207 million in 1995. 'This is an invaluable and indispensable research book for both academics and professionals of law, particularly on the rights of minority shareholders in corporates, and for those interested in the combat of fraud and corruption at the highest levels in a country.

PPSC-Punjab Accountant Exam: Commerce Subject Ebook-PDF Routledge
Pillage of Plantations in Sri Lanka, under the IMF, World Bank and ADB privatization agenda, incisively analyses, appallingly dubious privatizations of valuable plantations in Sri Lanka, causing the people colossal losses, exposing shocking indifference of international developmental agencies, completely eroding public confidence, which is crucial to foster a free and open economy, with transparency. Plantations historically base of the national economy, leading tea exporter in the world, were nationalized by Prime Minister Sirima Dias Bandaranaike. Her daughter, President Chandrika Bandaranaike Kumaratunga, who decried previous privatizations, as brazen pillage and plunder of peoples wealth by cronies, publicly avowed privatization would be transparent, free of corruption, and those in public life held accountable. Plantations privatizations were carried out by hand-picked confidantes, presided by Senior Partner, KPMG Ford Rhodes Thornton & Co., Rajan Asirwatham, under the purview of Deputy Minister Finance G.L. Peiris, also then Minister, Justice & Constitutional Affairs (now Minister, External Affairs), directly under President Kumaratunga. Though President Kumaratunga, Minister G.L. Peiris and then Foreign Minister Lakshman Kadirgamar, two Oxford educated, publicly decried as dubious and fraudulent plantations privatizations, assuring legal action, no action was taken thereon, arraigning the confidantes and cronies. What is demonstrated is that pontification by political leaders, espousing enforcement of the rule of law is mere rhetoric, and in reality, socio-politically influential are above the rule of law. It discloses the unashamed tolerance of fraud and corruption by confidantes of those at the helm in a country; with governments and society uninhibitedly bestowing upon corrupt miscreants, even more recognition and position, rather than arraigning them, as warranted, before the law; whilst some duplicitously articulate transparency and good governance. This book is an invaluable and indispensable research book on real case studies for those who are interested in privatization and advocating good governance; and to comprehend socio-political realities.

Dependence and Interdependence in Education Emerald Group Publishing

The governance of companies is of importance to developing countries due to the link between

effective corporate governance and economic development. Ownership and control of public companies, except in the US and UK, is often in the hands of a few individuals, families or corporate groups and impact on corporate governance and economic development. Using Sri Lanka as an illustrative example, Corporate Ownership and Control sets out the implications of corporate ownership and control structures on the governance of companies, and suggests a reform agenda to meet the challenges posed by such structures. Any analysis into the reform of corporate governance in developing countries should begin with a focus on the local market structures that define its adaptation and effectiveness. The issues explored in the book provide an insight into ownership and control structures in Sri Lanka, the costs and benefits of such structures, and the necessary reform framework to promote effective corporate governance. The analysis can be used to both understand the impact of ownership structures on corporate governance, and suggest how corporate governance issues arising from such structures should be resolved in order to promote economic development and growth.

20 Practice Sets for IBPS PO/ MT Preliminary Exam with 5 Online Tests 4th Edition Disha Publications
Since the late 1970s, Sri Lanka has undergone a socio-economic transformation, from protectionism towards economic liberalisation and increasing integration into the world economy. Through a systematic comparison of these periods of economic change (1956-1977, and 1977 to the present), Angela W. Little and Siri T. Hettige examine the impact of this transformation on education, youth employment and equality of opportunity in Sri Lanka. The book charts Sri Lanka's shift from a predominantly agricultural economy to one dominated by services and manufacturing, a reduction in unemployment, rising educational and occupational levels, expectations and achievements, and a reduction in poverty. In turn, it reveals a growing role for the private sector and foreign interests in post-secondary education and a modest growth in private education at the primary and secondary levels, as well as widening social disparities in access to qualifications, training and skills. The Sri Lankan experience of, and engagement with, globalisation has been tempered by a long-running ethnic conflict that hindered economic and social development and diverted considerable public funds into defence and war. Now that the war is 'won', the challenge is how to invest in human resource development and the fulfilment of the expectations of youth from all ethnic and social groups. This challenge requires serious policy analysis, the generation of more state revenues, the reallocation of existing public resources, and a political commitment to the winning of a sustainable peace and stability. This book makes an important contribution to the broader international literature on the implications of globalisation for education policy and practice, and to the interaction of exogenous and endogenous forces for educational change. It deals with the tension between the high social demand for education and the growing demand for specialised skills in a changing economy. As such, it has a wide interdisciplinary appeal across education policy and politics, Asian education, South Asian society, youth policy, sociology of education, political economy of social change, and globalisation.

Routledge Library Editions: Education Mini-Set A: Comparative Education 11 vol set Routledge

This volume provides an international perspective on educational dependency in considering both theories and actual developments throughout the world. Some less developed countries, in expanding their education systems, have emulated Western academic-style systems and have increased their dependence on Western models in various respects including examination validation. Others have deliberately avoided this path and have experimented with systems more 'relevant' to development, often in a radical way. At a theoretical level, Marxist and neo-Marxist development theorists argue that education systems dependent on the West are evidence of economic dependency and confirmation of Marxist development theories; while others argue that the evidence suggests an interdependent world and that dependency theories do not apply in education.

Non-Financial Reports and Accounts Chandresh Agrawal

The importance of moving toward high-quality, global standards of accounting and auditing has never been clearer. In the midst of the global financial and economic crisis, the leaders of the Group of 20 met and issued their Declaration on Strengthening the Financial System, placing significant emphasis on sound accounting and auditing standards as a critical piece of the international financial architecture. Transparent and reliable corporate financial reporting underpins much of the Latin America and Caribbean development agenda, from private-sector-led growth to enhanced financial stability, facilitating access to finance for small and medium enterprises, and furthering economic integration. For nearly 10 years, the World Bank has prepared diagnostic Reports on the Observance of Standards and Codes (ROSCs) on Accounting and Auditing (A and A) at the country level. In Latin America and the Caribbean, ROSC A and A reports have been completed for 17 countries. This book takes a step back and seeks to distill lessons from a regional perspective. 'Accounting for Growth in Latin America and the Caribbean' is the first book to examine financial

reporting and auditing in the region in a systematic way, drawing on the World Bank's years of experience and analysis in this area. The book is designed to inform the policy dialogue on accounting and auditing issues among government officials, the accounting profession, the private sector, academia, and civil society in LAC countries. It also seeks to disseminate the lessons learned to key players at the international and regional level, including the donor community, in order to generate momentum for reform of accounting and auditing throughout the region.

Sri Lanka IGI Global

'The Handbook of Accounting and Development examines the major areas of accounting and development (financial reporting, management control, taxation, education) in both the public and private sectors. The four editors have written two of the chapters, including the "Introduction" which is more substantial and useful than an average introduction. The remaining 14 chapters are contributed by 22 distinguished authors who work in nine different countries. The quality of the writing is high throughout. The Handbook should be warmly welcomed by policy-makers and academics, especially those of us who have not paid enough attention to such matters in the past.' - Christopher Nobes, Royal Holloway, University of London, UK 'Trevor Hopper and his colleagues provide a central point of reference for research into accounting and development. Definitive chapters from internationally recognised authors (including Marcia Annisette, Kerry Jacobs, Chris Poullaos, Brendan O'Dwyer, Chibuike Uche and Jeffrey Unerman) cover the full range of issues from the role of capital markets in development, through accounting professionalization, to taxation and transfer pricing. Contributions from authors working for donors and non-governmental organisations provide a useful practical dimension that builds on the more academic chapters.' - Christopher Napier, Royal Holloway, University of London, UK This innovative and informative Handbook brings together leading international researchers on accounting and development to review empirical evidence, issues, policies and practices both past and present. The perspectives of the expert contributors reflect the strong growth of research on the topic, as accounting is increasingly recognised as an important factor in development. The book draws commentary and analyses together to inform future research, practice and policy and raises awareness of the actual and potential role of accounting in formulating and executing development policy. With theoretical and empirically focused chapters, this Handbook will appeal to academics and postgraduate students in accounting and development studies, practitioners, policymakers and development partners.

Test of Professional Competence in Management Accounting Springer Nature

The Kenya Gazette is an official publication of the government of the Republic of Kenya. It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. South Asian Perspectives World Bank Publications

This edited volume brings together diverse thinkers and practitioners from the field of teaching and teacher education as it pertains to educational development in South Asia. In this volume, authors draw from their research, practice, and field experiences, showcasing how teaching and teacher education are currently being carried out, understood, theorized, debated, and implemented for the education of children and teachers alike in South Asia. The volume also includes practitioner voices, which are often marginalized in academic discourse. This book acts as a key reference text for academics and practitioners interested in the intersection of education and development in the region, and in particular what it takes to pull off ambitious teaching and teacher education in South Asia.

Corporate Governance and Economic Development in Sri Lanka Concept Publishing Company

In a global competitive economic environment, resources that are scarce or irreplicable are a source of sustained competitive advantage for companies and organizations. Knowledge-based resources are a major and increasing driver of long term competitive advantage. Most accounting standards however do not allow for knowledge-based resource calculations, including the most important of these, intellectual capital. Intellectual capital is the collective knowledge, documented and otherwise, of individuals in an organization. In the absence of accounting standards to numerically evaluate intellectual capital, some institutions have devised their own reports and statements. But why should companies, universities, and research centers measure these resources? How are intellectual capital statements built? How does one set targets, and what indicators should they include? This book reviews the development of the field of intellectual capital reporting, including core concepts, latest developments, the main components of intellectual capital, how a statement is built, and key indicators of each component. It further analyzes experiences from a variety of pioneering companies and institutions around the globe in measuring intellectual capital, including case studies from educational and research institutions, and provides crucial transnational comparisons. Authors Ordóñez de Pablos and Edvinsson examine the challenges and next steps for the harmonization of intellectual capital reports, consider the creation of a special international agency for intellectual capital reporting standards, and evaluate the weaknesses of current standards and how they might be overcome.
