For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems

their companies use to support everything from business critical applications to employee collaboration and electronic commerce. *Bulletin*

China's maritime "gray zone" operations represent a new challenge for the U.S. Navy and the sea services of our allies, partners, and friends in maritime East Asia. There, Beijing is waging what some Chinese sources term a "war without gunsmoke." Already winning in important areas, China could gain far more if left unchecked. One of China's greatest advantages thus far has been foreign difficulty in understanding the situation, let alone determining an effective response. With contributions from some of the world's leading subject matter experts, this volume aims to close that gap by explaining the forces and doctrines driving China's paranaival expansion, operating in the "gray zone" between war and peace. The book covers China's major maritime forces beyond core gray-hulled Navy units, with particular focus on China's second and third sea forces: the "white-hulled" Coast Guard and "blue-hulled" Maritime Militia. Increasingly, these paranaival forces, and the "gray zone" in which they typically operate, are on the frontlines of China's seaward expansion.

The Woodenboat

Harper's Magazine made its debut in June 1850, the brainchild of the prominent New York book-publishing firm Harper & Brothers. Harper's Magazine, the oldest general-interest monthly in America, explores the issues that drive our national conversation, through long-form narrative journalism and essays, and such celebrated features as the iconic Harper's Index. With its emphasis on fine writing and original thought Harper's provides readers with a unique perspective on politics, society, the environment, and culture.

OKAY has been termed 'a spectacular expression' and 'America's greatest invention.' This volume offers an in-depth empirical study of the uses that have resulted from its global spread.

Focusing on actions and interactional practices, it investigates OKAY in a variety of settings in 13 languages. The collected work showcases the importance of a holistic analysis: prosodic realization and the placement of OKAY in its larger sequential and multimodal context emerge as constitutive for distinct uses in individual languages. An inductive approach makes it possible to identify practices not previously documented, for example OKAY used for 'qualified acceptance' or as a 'continuer', and to document a core of recurrent, similar uses across languages. This work also outlines new research directions for comparative analysis by offering first insights into the diachronic development of OKAY's uses and the relationship of OKAY to other particles in specific languages.

New Genesee Farmer and Gardener's Journal

Spearhead of Logistics is a narrative branch history of the U.S. Army's Transportation Corps, first published in 1994 for transportation personnel and reprinted in 2001 for the larger Army community. The Quartermaster Department coordinated transportation support for the Army until World War I revealed the need for a dedicated corps of specialists. The newly established Transportation Corps, however, lasted for only a few years. Its significant utility for coordinating military transportation became again transparent during World War II, and it was resurrected in mid-1942 to meet the unparalleled logistical demands of fighting in distant theaters. Finally becoming a permanent branch in 1950, the Transportation Corps continued to demonstrate its capability of rapidly supporting U.S. Army operations in global theaters over the next fifty years. With useful lessons of high-quality support that validate the necessity of adequate transportation in a viable

national defense posture, it is an important resource for those now involved in military transportation and movement for ongoing expeditionary operations. This text should be useful to both officers and noncommissioned officers who can take examples from the past and apply the successful principles to future operations, thus ensuring a continuing legacy of Transportation excellence within Army operations. Additionally, military science students and military historians may be interested in this volume.
