"George Black rediscovers the history and lore of one of the planet's most magnificent landscapes. Read *Empire of Shadows*, and you'll never think of our first—in many ways our greatest—national park in the same way again." —Hampton Sides, author of *Blood and Thunder* *Empire of Shadows* is the epic story of the conquest of Yellowstone, a landscape uninhabited, inaccessible and shrouded in myth in the aftermath of the Civil War. In a radical reinterpretation of the nineteenth century West, George Black casts Yellowstone's creation as the culmination of three interwoven strands of history - the passion for exploration, the violence of the Indian Wars and the "civilizing" of the frontier - and charts its course through the lives of those who sought to lay bare its mysteries: Lt. Gustavus Cheyney Doane, a gifted but tormented cavalryman known as "the man who invented Wonderland"; the ambitious former vigilante leader Nathaniel Langford; scientist Ferdinand Hayden, who brought photographer William Henry Jackson and painter Thomas Moran to Yellowstone; and Gen. Phil Sheridan, Civil War hero and architect of the Indian Wars, who finally succeeded in having the new National Park placed under the protection of the US Cavalry. *George Black's Empire of Shadows* is a groundbreaking historical account of the origins of America's majestic national landmark.

In a world drowning in data, a fugitive tries to outrun the forces that want to reprogram him, in this smart, edgy novel by a Hugo Award-winning author. Constantly shifting his identity among a population choking on information, innovation, and novelty, Nickie Haflinger is a most dangerous outlaw, yet he doesn't even appear to exist. As global society falls apart in all directions, with corporate power run amok and personal freedom surrendered to computers and bureaucrats, Haflinger is caught and about to be re-programmed. Now he has to try to escape once again, defy the government—and turn the tide of organizational destruction, in this visionary science fiction novel by the author of *The Sheep Look Up* and *Stand on Zanzibar*. "Brunner writes about the future as if he and the reader were already living in it." —The New York Times Book Review "When John Brunner first told me of his intention to write the book, I was fascinated—but I wondered whether he, or anyone, could bring it off. Bring it off he has, with cool brilliance. A hero with transient personalities, animals with souls, think tanks and survival communities fuse to form a future so plausibly alive it as twitched at me ever since." —Alvin Toffler, author of *Future Shock* "One of the most important science fiction authors. Brunner held a mirror up to reflect our foibles because he wanted to save us from ourselves." —SF Site

Implant dentistry is now an integral part of everyday dental practice; however, most dentists receive their education in implant dentistry after graduation, with little emphasis on the identification of the complexity and risks of treatment. Since 2003 the International Team for Implantology (ITI) has recommended the SAC Classification to categorize implant treatment procedures into three levels of difficulty—straightforward, advanced, and complex. In 2007 the ITI organized a conference to standardize the application of the SAC classification, the conclusions of which are presented in this volume. This invaluable resource will help clinicians identify treatment complexity and risk before treating a patient, thereby improving the predictability and success of their outcomes.

This book attempts to convey some of the challenges that those wielding the law for social change purposes have faced and the successes they have achieved. By intention, it is more a studied appreciation than a critical analysis of their efforts. We asked an international team of consultants to help us document and describe how various law-based strategies have worked in very different settings, to draw out connections between those efforts, and to highlight some of the insights that emerge from grantees' experiences in law-related work. We also asked them to help us learn more about the ways the Foundation has played a role in these efforts. Known as the Global Law Programs Learning Initiative (GLPLI), this effort is not definitive, but rather suggestive. Our goal is to contribute to more serious future reflection and, ultimately, more effective programs in this field.
