Logic in the Theory and Practice of Lawmaking Cambridge University Press
Comprising specially selected papers this book presents trans-disciplinary research on issues related to the nature of water, and its use and exploitation by society. The valuable research contained in this book demonstrates the need to bridge the gap between physical, biological, environmental and health sciences. Water is essential for sustaining life on our planet, nevertheless its unequal distribution is a source of permanent conflict. It is predicted that population growth and irregular rainfall, due to climate change, may lead to more restricted access to water in certain regions of the world. This problem is made even more severe by human actions that can cause degradation to nature and the environment. The availability of clean and inexpensive water can no longer be taken for granted as the need for water continues to increase due a growing global population. Heavy water consumers such as agriculture and industry often contribute to its contamination. Water distribution networks in urban areas and soiled water collection systems, present serious problems as well as the need to maintain ageing infrastructures. Possible technologically solutions, such as desalination or pumping systems are energy demanding but, as costs rise, the techniques currently developed may need to be re-assessed.

Laboratories of Autocracy Apress
All recent books on international social work mention Africa only briefly and few engage with the broader field of development studies. This book focuses solely on the unique African context engaging with issues relating to social work and development more broadly thus enabling a deeper examination and more complex and nuanced picture to emerge. Unlike most academic works, this book highlights multiple practitioner voices, with authors or co-authors that have recently been or are currently practising social workers. As an edited book, it draws from both academic research as well as lived practice experience, supported by strong theoretical positioning and guidance in introductory chapters, drawing on African literature, wherever possible. Looking at case-studies from Lesotho, Botswana, Kenya, Zimbabwe, Ethiopia, Namibia, Uganda, Nigeria, Kenya, South Africa, Rwanda, Zambia and Tanzania and covering established areas of practice such as child protection; working with older people; working with people with disabilities; mental health; and mainstream services targeting women as well as emerging areas of developmental social work practice, such as humanitarian assistance in post-conflict situations; work with immigrants and refugees; and the training of community-based workers, this book takes a future-oriented perspective that aims to move beyond well-worn critiques to envision constructive and sustainable futures for social work and social development in Africa from a critical perspective.

eGirls, eCitizens Routledge
In this how-to guide, ecologist and forest farmer Steve Gabriel explores the philosophy and techniques behind silvopasture - the integration of trees, animals, and forages in a whole-system approach that creates a number of benefits for livestock, farmers, and the environment. This system not only provides a sustainable farm income, but also holds the key to restoring land, building soil carbon, and creating climate resilience.--COVER.

The Elements Routledge
Medical and pharmaceutical history is replete with examples of dangerous interventions that have poisoned, injured, or killed. However, events since 2020 have attracted attention as never before to medicine’s potential to be both lethal and malevolent. In The Medical-Pharmaceutical Killing Machine, Children’s Health Defense situates current perils in their broader context with the aim of helping readers understand how to protect themselves and their loved ones. In the Greek Trojan War saga, the god Apollo ensured that Cassandra’s prophecies would never be believed, with disastrous consequences. As recounted in the book, modern medicine, too, has produced its fair

share of “medical Cassandras”—doctors and writers who have tried to warn the public about medicine’s life-threatening underbelly, generally to little avail. A chapter dedicated to nine of these medical skeptics, beginning with Ivan Illich and his coining of the term “iatrogenesis” to describe adverse outcomes caused by doctors, weaves a powerful portrait of harms regularly denied and ignored, with those making the claims typically marginalized and “canceled.” The book shows that there is no shortage of tools in the killing machine arsenal. One chapter highlights the mRNA vaccine technology inaugurated with COVID, illustrating how this new mechanism for iatrogenesis is inflicting novel forms of toxicity, not all of which are yet understood. Another chapter about assisted suicide and euthanasia describes the chilling global proliferation of policies and propaganda promoting those practices for vulnerable populations that include babies, children, people diagnosed with autism, and the mentally ill. The book also describes factors that make it possible for the killing machine to continue operating with impunity, including the ascendancy of an “evidence-based medicine” juggernaut, medical gaslighting, and a ballooning global enforcement infrastructure. Nor does it shy away from confronting what some now characterize as “iatrogenocide”; a chapter asking “Why Do They Do It?” considers money, prestige, and control as three possible answers. Ultimately, it is only by acknowledging the long-standing reality of an all-too-effective medical-pharmaceutical killing machine that people can learn to dodge the threats and work toward building a different model that prioritizes life and genuine health.

Facing Challenges and Complexities in Retention of Novice Teachers Routledge
The United States has by far the world’s largest population of incarcerated people. More than a million Americans are imprisoned; hundreds of thousands more are held in jails. This vast system has doled out punishment—particularly to people from marginalized groups—on an unfathomable scale. At the same time, it has manifestly failed to secure public safety, instead perpetuating inequalities and recidivism. Why does the United States see punishment as the main response to social harm, and what are the alternatives? This book brings together essays by scholars, practitioners, activists, and writers, including incarcerated and formerly incarcerated people, to explore the harms of this punitive approach. The chapters address a range of issues, from policing to prosecution, and from how people are treated in prison to the consequences of a criminal conviction. Together, they consider a common theme: We cannot reduce our dependence on mass incarceration until we confront our impulse to punish in ways that are excessive, often wildly disproportionate to the harm caused. Essays trace how a maze of local, state, and federal agencies have contributed to mass incarceration and deterred attempts at reform. They shed light on how the excesses of America’s criminal legal system are entwined with poverty, racism, and the legacy of slavery. A wide-ranging and powerful look at the failures of the status quo, Excessive Punishment also considers how to reimagine the justice system to support restoration instead of retribution.

Silvopasture Bloomsbury Publishing USA
The Lakota and Dakota are among the most famous indigenous peoples of North America. Known as "Sioux", they were feared for their fierce resistance to the advance of white Americans. Today, they are no longer fighting the U.S. Cavalry, but poverty, alcoholism, racism, and pipelines. "Broken Hoop" describes their history from the first contact with Europeans until today - their wanderings, their development from horticulture farmers to nomads on horseback, their fight for their land and their way of life, and their dealing with the modern world.

Social Science Research McFarland
Elm brings the safety and stability of functional programing to front-end development, making it one of the most popular new languages. Elm's functional nature and static typing means that run-time errors are nearly impossible, and it compiles to JavaScript for easy web deployment. This book helps you take advantage of this new language in your web site development. Learn how the Elm Architecture will help you create fast applications. Discover how to integrate Elm with JavaScript so you can update legacy applications. See how Elm tooling makes deployment quicker

and easier. Functional programming offers safer applications with decreased runtime errors, but functional solutions that are type safe and easy to use have been hard to find, until the Elm language. Elm has the benefits of functional languages while compiling to JavaScript. This book provides a complete tutorial for the Elm language, starting with a simple static application that introduces Elm syntax, modules, and the virtual DOM, to exploring how to create a UI using functions. See how Elm handles the issues of state in functional languages. You'll continue to build up larger applications involving HTTP requests for communication. Integrate your Elm applications with JavaScript so you can update legacy applications or take advantage of JavaScript resources. Elm also provides built-in tooling to alleviate the tooling creep that's so common in JavaScript. This book covers Elm's deployment and testing tools that ease development confusion. Dive into advanced concepts including creating single-page applications, and creating performance improvements. Elm expert Jeremy Fairbank brings his years of web development experience to teaching how to use Elm for front-end development. Your web UIs will be faster, safer, and easier to develop with Elm and this tutorial. What You Need: You will need the latest version of Elm, 0.19, along with a browser to run the examples in this book.

Critical Wage Theory WIT Press
Tommy Thompson arrived in Chapel Hill, North Carolina, in 1963, smitten by folk and traditional Appalachian music. In 1972, he teamed with Bill Hicks and Jim Watson to form the nontraditional string band the Red Clay Ramblers. Mike Craver joined in 1973, and Jack Herrick in 1976. Over time, musicians including Clay Buckner, Bland Simpson and Chris Frank joined Tommy, who played with the band until 1994. Drawing on interviews and correspondence, and the personal papers of Thompson, the author depicts a life that revolved around music and creativity. Appendices cover Thompson's banjos, his discography and notes on his collaborative lyric writing.

The second edition Handbook of Psychological Assessment in Primary Care Settings offers an overview of the application of psychological screening and assessment instruments in primary care settings. This indispensable reference addresses current psychological assessment needs and practices in primary care settings to inform psychologists, behavioral health clinicians, and primary care providers the clinical benefits that can result from utilizing psychological assessment and other behavioral health care services in primary care settings.

The Supper The Pragmatic Programmers LLC
A cooperative publication of the National Association for Gifted Children and Prufrock Press, Serving Gifted Students in Rural Settings provides a framework for educating the gifted in rural settings. The book outlines practical, theoretical, and evidence-supported approaches for understanding, teaching, and leading programs for this unique population. Case study vignettes and practical ideas for administrators and teachers are combined with theoretical applications. The first of three sections in the book outlines the various philosophies and current status of rural education. The second section focuses on practical strategies and evidence-supported approaches for identifying and serving rural gifted students based on their unique geography. Section three highlights support structures that are necessary for leading and supporting gifted education in rural schools. This book helps bridge the gap existing between rural education and accessible, effective gifted education.

Privacy, Regulations, and Cybersecurity Createspace Independent Publishing Platform
Protect business value, stay compliant with global regulations, and meet stakeholder demands with this privacy how-to Privacy, Regulations, and Cybersecurity: The Essential Business Guide is your guide to understanding what “privacy” really means in a corporate environment: how privacy is different from cybersecurity, why privacy is essential for your business, and how to build privacy protections into your overall cybersecurity plan. First, author Chris Moschovitis walks you through our evolving definitions of privacy, from the ancient world all the way to the General Law on Data Protection (GDPR). He then explains—in friendly, accessible language—how to orient your

preexisting cybersecurity program toward privacy, and how to make sure your systems are compliant with current regulations. This book—a sequel to Moschovitis’ well-received Cybersecurity Program Development for Business—explains which regulations apply in which regions, how they relate to the end goal of privacy, and how to build privacy into both new and existing cybersecurity programs. Keeping up with swiftly changing technology and business landscapes is no easy task. Moschovitis provides down-to-earth, actionable advice on how to avoid dangerous privacy leaks and protect your valuable data assets. Learn how to design your cybersecurity program with privacy in mind Apply lessons from the GDPR and other landmark laws Remain compliant and even get ahead of the curve, as privacy grows from a buzzword to a business must Learn how to protect what’s of value to your company and your stakeholders, regardless of business size or industry Understand privacy regulations from a business standpoint, including which regulations apply and what they require Think through what privacy protections will mean in the post-COVID environment Whether you’re new to cybersecurity or already have the fundamentals, this book will help you design and build a privacy-centric, regulation-compliant cybersecurity program.

Programming Elm Pearson Education

“It’s the statehouses, stupid.” Laboratories of Autocracy shows that far more than the high-profile antics of politicians like Marjorie Taylor Greene or Jim Jordan—and yes, even bigger than Donald Trump’s “Big Lie”—it’s anonymous, often corrupt politicians in statehouses across the country who pose the greatest dangers to American democracy. Because these statehouses no longer operate as functioning democracies, these unknown politicians have all the incentive to keep doing greater damage, and can not be held accountable however extreme they get. This has driven steep declines in states like Ohio and others across the country. And collectively, it’s placed American democracy in its greatest peril since the dawn of the Jim Crow era. But Pepper doesn’t stop there. He lays out a robust pro-democracy agenda outlining how everyone from elected officials to business leaders to everyday citizens can fight back.

Nanosatellites St. Helena Press

In “A Message to the Young Black Males”, young Black men embark on a transformative journey guided by Maurice I. Crawford’s profound insights and unwavering commitment to uplifting young men from marginalized backgrounds. Through a carefully woven mosaic if personal anecdotes, practical wisdom, and genuine encouragement, this book serves as a beacon of hope for those navigating the complexities of life. With empathy and understanding, the author addresses the unique challenges young men of color face, offering strategies to overcome adversity and harness their inherent potential. From navigating systemic barriers to confronting internal doubts, ‘A Message to the Young Black Males’ equips young Black men with the tools needed to thrive in a world that often underestimates their worth. At the heart of this book lies a powerful message of resilience reminder that setbacks are not limitations but opportunities for growth. Through stories of triumph over adversity and lessons learned from failure, Black men are inspired to cultivate resilience in the face of adversity, knowing that their journey is as much about the process as it is about the destination. Central to Maurice I. Crawford’s message is the importance of self-awareness and embracing one’s individuality. By encouraging young Black males to embrace their unique strengths and talents, ‘A Message to the Young Black Males’ empowers young men to defy stereotypes and carve out their own paths to success. Whether pursuing higher education, entering the workforce, or pursuing their passions, readers are encouraged to pursue their dreams with courage and conviction. In a world that often seeks to confine young men of color to narrow

stereotypes, ‘A Message to the Young Black Males’ serves as a rallying cry for empowerment and self-determination. It is a testament to the resilience, strength, and boundless potential of young men of color everywhere – a must-read for anyone committed to fostering their growth and empowerment in our society.

Handbook on Pretrial Justice Wipf and Stock Publishers

Nanosatellites: Space and Ground Technologies, Operations and Economics Rogerio Atem de Carvalho, Instituto Federal Fluminense, Brazil Jaime Estela, Spectrum Aerospace Group, Germany and Peru Martin Langer, Technical University of Munich, Germany Covering the latest research on nanosatellites Nanosatellites: Space and Ground Technologies, Operations and Economics comprehensively presents the latest research on the fast-developing area of nanosatellites. Divided into three distinct sections, the book begins with a brief history of nanosatellites and introduces nanosatellites technologies and payloads, also explaining how these are deployed into space. The second section provides an overview of the ground segment and operations, and the third section focuses on the regulations, policies, economics, and future trends. Key features: Payloads for nanosatellites Nanosatellites components design Examines the cost of development of nanosatellites. Covers the latest policies and regulations. Considers future trends for nanosatellites. Nanosatellites: Space and Ground Technologies, Operations and Economics is a comprehensive reference for researchers and practitioners working with nanosatellites in the aerospace industry.

Personalities on the Plate IAP

The border is one of the most urgent issues of our times. We tend to think of a border as a static line, but recent bordering techniques have broken away from the map, as governments have developed legal tools to limit the rights of migrants before and after they enter a country’s territory. The consequent detachment of state power from any fixed geographical marker has created a new paradigm: the shifting border, an adjustable legal construct untethered in space. This transformation upsets our assumptions about waning sovereignty, while also revealing the limits of the populist push toward border-fortification. At the same time, it presents a tremendous opportunity to rethink states’ responsibilities to migrants. This book proposes a new, functional approach to human mobility and access to membership in a world where borders, like people, have the capacity to move.

A Message to the Young Black Males John Wiley & Sons

This collection immerses scholars of communication and related disciplines in narratives of and conversations about social-justice-focused activism. Through autoethnographic essays, Mindful Activism chronicles the authors’ experiences as activist academics challenging and seeking to remedy injustices on campus and in local and global communities. Those experiences range from engaging in a single activist act to collaborating over many years with oppressed communities and social change groups. Building upon communication activism research and following a liberation-based transformative learning model, the book shows both activism in action and deep reflection on that activism. The authors re-experience activist experiences, draw out lessons, and invite readers to apply those to their own social justice endeavors. Mindful Activism also demonstrates how mindfulness supports activists in deepening their awareness and understanding of themselves, others, and social systems. This orientation increases the likelihood that activists will remain grounded enough to respond to injustice mindfully/effectively. The book will enrich courses

on activism, social justice, dialogue, narrative inquiry, qualitative methods, autoethnography, and general graduate studies, and will resonate with scholars committed to building a more equitable and just world.

Illustrator CC University of Chicago Press

The purpose of this book seeks to examine the leadership of the Black church through a critical and theoretical lens utilizing historical and anthropological foci to better identify and understand some of the challenges within the paramount institution and its attrition to the Black American community at large and provide appropriate suggestions and generating frameworks for addressing the challenges. The church has always played a pivotal role in Black American culture's identity, development, and progression. Leadership and organizational challenges within the church pervasively matriculate to other Black spaces, historically Black organizations, and a broader societal context. Due to the church's historical and ethnographic context for Blacks in America, many of the challenges faced in the church go unrecognized, unspoken, thus unattended. This manuscript endeavors to identify the challenges, and flaws through research and data, to provide solutions through practical and theoretical implementations to some shortcomings for the betterment of the church and culture. The interconnectedness of culture and religion for Blacks in America established a gargantuan impact factor on the church and its leaders. This manuscript examines the pervading effects of the influence through leadership dispensation. It also explores the understanding of leadership through the lens of Black Christianity, deriving that the foundation of leadership in the Black community was primarily circumscribed by the influence of the church as conglomerate collectivism of almost five hundred years of the history and culture of Africans, African descendants, and members of the African diaspora in what is now America who contributed to the ideal of the Black church. The critical analysis provided is not one of condemnation but likened to a vital performance review through member experiences barred against applicable leadership and organizational development barometers.

The shifting border: Legal cartographies of migration and mobility Columbia University Press

This book is designed to introduce doctoral and graduate students to the process of scientific research in the social sciences, business, education, public health, and related disciplines.

Tommy Thompson Fulton Books, Inc.

eGirls, eCitizens is a landmark work that explores the many forces that shape girls’ and young women’s experiences of privacy, identity, and equality in our digitally networked society. Drawing on the multi-disciplinary expertise of a remarkable team of leading Canadian and international scholars, as well as Canada’s foremost digital literacy organization, MediaSmarts, this collection presents the complex realities of digitized communications for girls and young women as revealed through the findings of The eGirls Project (www.egirlsproject.ca) and other important research initiatives. Aimed at moving dialogues on scholarship and policy around girls and technology away from established binaries of good vs bad, or risk vs opportunity, these seminal contributions explore the interplay of factors that shape online environments characterized by a gendered gaze and too often punctuated by sexualized violence. Perhaps most importantly, this collection offers first-hand perspectives collected from girls and young women themselves, providing a unique window on what it is to be a girl in today’s digitized society. Published in English.
