for its sustained progress. But management has been viewed differently by various scholars, depending upon their belief and comprehensions. Some regard it as the force that runs a business and is responsible for its success or failure. Others perceive it as a means for achievement of desired results through group efforts and by utilising both human and non-human

resources. Still others deem management to be a process comprising planning, organising, staffing, directing and controlling. Also, some look at it as an instrument for designing and maintaining an environment conducive to the performance of individuals who are working together in a group towards the accomplishment of some predetermined objectives. This study

provides an overview on different aspects of human resource management in 15 lessons, explained by experts in this area.
