Financial services in particular is one non-oil area where the emirate is starting to pull ahead, with recent growth in the Islamic financial services segment fuelling the emirate's ambition of becoming the knowledge-based capital of the Islamic economy in the future. Meanwhile, Dubai's real estate and construction sectors, which were badly affected by the 2008 financial meltdown, are once again thriving as the legacies of the global crisis recede, and the debts incurred from that time are repaid and restructured. Indeed Dubai is now firmly focused on the future, with preparations for Dubai Expo 2020 in particular helping nourish its economic recovery, development and growth in recent years. The event is expected to attract 25m visitors over a six-month period and the build-up is driving development across several sectors. The preparations,

This lush book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals-especially those that are endangered. His powerful message, conveyed with humor, compassion, and art- to know these animals is to save them.Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year

partnership with National Geographic, he may reach his goal. This book showcases his animal portraits- from tiny to mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the eloquent prose of veteran wildlife writer Douglas Chadwick, this book presents a thought-provoking argument for saving all the species of our planet.

The true story of an adventurer-turned-warrior fighting poachers and traffickers to protect animals from extinction. Staging heart-pounding, espionage-style raids, Ofir Drori and his organization, The Last Great Ape (LAGA), have put countless poachers and traffickers of endangered species behind bars, and they have fought back against a Kafkaesque culture of corruption. Before Ofir arrived in Cameroon, no one had ever even tried. The Last Great Ape follows a young Ofir on fantastical adventures as he crosses remote African lands by camel, on a horse, and in dug-out canoes, while living with exotic tribes and struggling against nature at its rawest: charging elephants and hyenas, flash floods, and the need to eat river algae and snails to stay alive. The story moves from places of extreme beauty to those of the darkest horror: the war zones of Sierra Leone and Liberia. Ofir begins to work as a photojournalist in order to expose his shocking encounter with war victims and child soldiers. His experiences forge in him a resolution to become an activist and to fight for justice. The search for a cause eventually leads him to Cameroon. When Ofir discovers that no one is fighting to disprove Jane Goodall's dark prophecy that apes in the wild will be extinct in twenty years, he decides that he is the

man to step in; because he knows he can make a difference, he sees it as his responsibility. And LAGA is born. The Last Great Ape is a story of the fight against extinction and the tragedy of endangered worlds, not just of animals but of people struggling to hold onto their culture. This book reveals the intense beauty and strife that exist side by side in Africa, and Ofir makes the case that activism and dedication to a cause are still relevant in a cynical modern world. This dangerous and dramatic story is one of courage and hope and, most importantly, a search for meaning.

Situating safari tourism within the discourses and practices of development, *Selling the Serengeti* examines the relationship between the Maasai people of northern Tanzania and the extraordinary influence of foreign-owned ecotourism and big-game-hunting companies. It looks at two major discourses and policies surrounding biodiversity conservation, the championing of community-based conservation and the neoliberal focus on private investment in tourism, and their

profound effect on Maasai culture and livelihoods. This ethnographic study explores how these changing social and economic relationships and forces remake the terms through which state institutions and local people engage with foreign investors, communities, and their own territories. The book highlights how these new tourism arrangements change the shape and meaning of the nation-state and the village and in the process remake cultural belonging and citizenship. Benjamin Gardner's experiences in Tanzania began during a study abroad trip in 1991. His stay led to a relationship with the nation and the Maasai people in Loliondo lasting almost twenty years; it also marked the beginning of his analysis and ethnographic research into social movements, market-led conservation, and neoliberal development around the Serengeti.
