Examines the historic sanctions, export controls, and import restrictions enacted in response to Russia's 2022 invasion of Ukraine.

Learning from Difference: Comparative Accounts of Multicultural Education Routledge

Directly presenting the considered views of a broad cross-section of the international arbitration community, this timely collection of essays addresses the criticism of the arbitral process that has been voiced in recent years, interpreting the challenge as an invitation to enlightenment. The volume records the entire proceedings of the twenty-fifth Congress of the International Council for Commercial Arbitration (ICCA), held in Edinburgh in September 2022. Topics range from the impact of artificial intelligence to the role of international arbitration in restraining resort to unilateralism, protectionism, and nationalism. The contributors tackle such contentious issues as the following: time and cost; gender and cultural diversity; confidentiality vs. transparency; investor-State dispute settlement procedures; the proposed establishment of a permanent international investment court system; how cross-fertilisation across different disciplines may impact international arbitration; determining whether a document request seeks documents that are relevant and material to the outcome of a dispute; whether we would be better off if investment arbitration were to disappear; and implications for international arbitration of the Russian invasion of Ukraine. There is consideration of global issues that are likely to give rise to disputes in the future, including climate change, environmental protection, access to depleting water resources, energy and

mining transition, and human rights initiatives. Several contributions focus on developments in specific countries (China, India) and regions (Africa, the Middle East). Arbitrators, corporate counsel, and policymakers will appreciate this opportunity to engage with current thinking on key issues in international commercial and investment arbitration, especially given the diversity of thought presented by authors from all over the world. "It's the statehouses, stupid." Laboratories of Autocracy shows that far more than the high-profile antics of politicians like Marjorie Taylor Greene or Jim Jordan—and yes, even bigger than Donald Trump's "Big Lie"—it's anonymous, often corrupt politicians in statehouses across the country who pose the greatest dangers to American democracy. Because these statehouses no longer operate as functioning democracies, these unknown politicians have all the incentive to keep doing greater damage, and can not be held accountable however extreme they get. This has driven steep declines in states like Ohio and others across the country. And collectively, it's placed American democracy in its greatest peril since the dawn of the Jim Crow era. But Pepper doesn't stop there. He lays out a robust pro-democracy agenda outlining how everyone from elected officials to business leaders to everyday citizens can fight back. This collection immerses scholars of communication and related disciplines in narratives of and conversations about social-justice-focused activism. Through autoethnographic essays, Mindful Activism chronicles the authors' experiences as activist academics challenging and seeking to remedy injustices on campus and in local and global communities. Those experiences range from engaging in a single activist act to collaborating over many years with oppressed communities and social change groups. Building upon communication activism research and

following a liberation-based transformative learning model, the book shows both activism in action and deep reflection on that activism. The authors re-experience activist experiences, draw out lessons, and invite readers to apply those to their own social justice endeavors. Mindful Activism also demonstrates how mindfulness supports activists in deepening their awareness and understanding of themselves, others, and social systems. This orientation increases the likelihood that activists will remain grounded enough to respond to injustice mindfully/effectively. The book will enrich courses on activism, social justice, dialogue, narrative inquiry, qualitative methods, autoethnography, and general graduate studies, and will resonate with scholars committed to building a more equitable and just world.

**Serving Gifted Students in Rural Settings** Lexington Books  
Comprising specially selected papers this book presents trans-disciplinary research on issues related to the nature of water, and its use and exploitation by society. The valuable research contained in this book demonstrates the need to bridge the gap between physical, biological, environmental and health sciences. Water is essential for sustaining life on our planet, nevertheless its unequal distribution is a source of permanent conflict. It is predicted that population growth and irregular rainfall, due to climate change, may lead to more restricted access to water in certain regions of the world. This problem is made even more severe by human actions that can cause degradation to nature and the environment. The availability of clean and inexpensive water can no longer be taken for granted as the need for water continues to increase due a growing global population. Heavy water consumers such as agriculture and industry often

contribute to its contamination. Water distribution networks in urban areas and soiled water collection systems, present serious problems as well as the need to maintain ageing infrastructures. Possible technological solutions, such as desalination or pumping systems are energy demanding but, as costs rise, the techniques currently developed may need to be re-assessed.

Unveiling Whiteness in the Twenty-First Century: Global Manifestations, Transdisciplinary Interventions is a tightly interconnected and richly collaborative book that will advance our understanding of why it is so difficult to re-form and reimagine whiteness in the twenty-first century. Composed after the election of the first black U.S. president, post-global financial crisis, more than a decade after 9/11, and concomitant with a rash of xenophobic incidents across the globe, the book distills several key themes associated with a post-millennial global whiteness: the individual and collective emotions of whiteness, the recentering of whiteness through governing and legal strategies, and the retreats from social equity and justice that have characterized the late twentieth and twenty-first century nation state. It also attempts the difficult work of reimagining white identities and cultures for a new era. Chapters in Unveiling Whiteness in the Twenty-First Century draw from the fields of African-American studies, English studies, media studies, philosophy, political science, psychology, sociology, education, and women's studies. Using transdisciplinarity as a mode of inquiry for the project and responding to the changing phenomenon of whiteness across several continents (Australia, Canada, France, Romania, South Africa, Sweden, and the United States), the collection brings together established and emerging scholars and a range of critical approaches to unveil and intervene in the ideologies of whiteness in our contemporary moment. Unveiling Whiteness in the Twenty-First Century demonstrates that complex inquiry and activism are needed to challenge new iterations of whiteness in twenty-first-century political and social spaces.

The Handbook on Pretrial Justice covers the front end of the

criminal legal system from pretrial diversion to pretrial detention or release. Often overlooked, the decisions made at the earliest phases of the criminal legal system have huge implications for defendants and their families, the community, and the system itself, and impact the entire criminal legal system. This collection of essays and reports of original research explores the complexities of pretrial decisions and practices and includes chapters in the following broad areas: the consequences of detention, pretrial decision-making, community supervision, and risk assessment. The book also includes a section looking at pretrial justice outside of the U.S. Each chapter summarizes what is known, identifies the gaps in the research, and discusses the theoretical, empirical, and policy implications of the research findings. This is Volume 6 of the American Society of Criminology's Division on Corrections and Sentencing handbook series. The handbooks provide in-depth coverage of seminal and topical issues around sentencing and correction for scholars, students, practitioners, and policymakers.

eGirls, eCitizens is a landmark work that explores the many forces that shape girls' and young women's experiences of privacy, identity, and equality in our digitally networked society. Drawing on the multi-disciplinary expertise of a remarkable team of leading Canadian and international scholars, as well as Canada's foremost digital literacy organization, MediaSmarts, this collection presents the complex realities of digitized communications for girls and young women as revealed through the findings of The eGirls Project ([www.egirlsproject.ca](http://www.egirlsproject.ca)) and other important research initiatives. Aimed at moving dialogues on scholarship and policy around girls and technology away from established binaries of good vs bad, or risk vs opportunity, these seminal contributions explore the interplay of factors that shape online environments characterized by a gendered gaze and too often punctuated by sexualized violence. Perhaps most importantly, this collection offers first-hand perspectives collected from girls and young women themselves, providing a unique window on what it is to be a girl in today's digitized society. Published in English.

In this highly original and personal book, Ruben J. Garcia argues forcefully that we must center the minimum wage as a tool for fighting structural racism. Employing the lessons of critical race theory to show how low minimum wages and underenforcement of workplace laws have always been features of our racially stratified society, Garcia explains why we must follow the leadership of social movements by treating increases in minimum wage levels and enforcement as matters of racial justice. Offering solutions that would benefit all workers, especially the immigrants and people of color most often made victims of wage theft,

Critical Wage Theory is essential reading for anyone who seeks a more just future for the working class.

How much does money really matter in American politics? A first-of-its-kind reference book, this encyclopedia provides the most up-to-date research and analysis regarding how money affects American campaigns, elections, politics, and public policy. Some Americans have come to the conclusion that U.S. politics is dominated by money, that politicians are frequently if not routinely "bought and paid for," and that the only entities who wield political power are America's monied "elite" or powerful special interests like "big labor" or "Wall Street." But other American citizens believe that proposals to limit the influence of money in politics run counter to the free speech principles enshrined in the Constitution. This book will explore this compelling and controversial issue, examining where money in American politics comes from, where it goes, and the impact of all of those millions of dollars on American society. The entries objectively cover a breadth of major issues, organizations, individuals, court cases, and controversies surrounding the role of money in American politics, especially into the most recent events of the 21st century. Commentary by leading experts and scholars on American politics assess different aspects of how money is used for political purposes. The book explains the current state of knowledge about money in politics, including whether contributions and expenditures should be regulated; if so, how; and whether it even matters in terms of impact. While intended and written primarily for students at the high school and undergraduate levels, *Money in American Politics: An Encyclopedia* will also be of interest to general readers and experts looking to better understand how money affects campaigns, elections, and the making of law and policy in the United States.

*Arbitration's Age of Enlightenment?* Wipf and Stock Publishers Medical and pharmaceutical history is replete with examples of dangerous interventions that have poisoned, injured, or killed. However, events since 2020 have attracted attention as never before to medicine's potential to be both lethal and malevolent. In *The Medical-Pharmaceutical Killing Machine*, Children's Health Defense situates current perils in their broader context with the aim of helping readers understand how to protect themselves and their loved ones. In the Greek Trojan War saga, the god Apollo ensured that Cassandra's prophecies would never be believed, with disastrous consequences. As recounted in the book, modern medicine, too, has produced its fair share of "medical Cassandras"—doctors and writers who have tried to warn the

public about medicine's life-threatening underbelly, generally to little avail. A chapter dedicated to nine of these medical skeptics, beginning with Ivan Illich and his coining of the term "iatrogenesis" to describe adverse outcomes caused by doctors, weaves a powerful portrait of harms regularly denied and ignored, with those making the claims typically marginalized and "canceled." The book shows that there is no shortage of tools in the killing machine arsenal. One chapter highlights the mRNA vaccine technology inaugurated with COVID, illustrating how this new mechanism for iatrogenesis is inflicting novel forms of toxicity, not all of which are yet understood. Another chapter about assisted suicide and euthanasia describes the chilling global proliferation of policies and propaganda promoting those practices for vulnerable populations that include babies, children, people diagnosed with autism, and the mentally ill. The book also describes factors that make it possible for the killing machine to continue operating with impunity, including the ascendancy of an "evidence-based medicine" juggernaut, medical gaslighting, and a ballooning global enforcement infrastructure. Nor does it shy away from confronting what some now characterize as "iatrogenocide"; a chapter asking "Why Do They Do It?" considers money, prestige, and control as three possible answers. Ultimately, it is only by acknowledging the long-standing reality of an all-too-effective medical-pharmaceutical killing machine that people can learn to dodge the threats and work toward building a different model that prioritizes life and genuine health.

Of the all the people surrounding the assassination of President Kennedy, few are more mysterious and enigmatic than David

William Ferrie of New Orleans. Author Judyth Vary Baker knew David Ferrie personally and worked with him in a covert project in New Orleans during the summer of 1963, and this book examines his strange and puzzling behavior both before and after the assassination. At the time of the assassination, Ferrie was a 45-year-old New Orleans resident who was acquainted with some of the most notorious names linked to the assassination: Lee Oswald, Clay Shaw, Guy Banister, Jack Ruby, and Carlos Marcello. He possessed assorted talents and eccentricities: he was at one time a senior pilot with Eastern Airlines until he was fired for homosexual activity on the job; he was also a hypnotist; a serious researcher of the origins of cancer; an amateur psychologist; and a victim of a strange disease, alopecia, which made all of his body void of hair. His odd lifestyle was embellished with an equally bizarre appearance featuring a red toupee and false eyebrows. This is the first book focused solely on David Ferrie and his alleged involvement in the conspiracy to assassinate President John F. Kennedy.

The Lakota and Dakota are among the most famous indigenous peoples of North America. Known as "Sioux", they were feared for their fierce resistance to the advance of white Americans. Today, they are no longer fighting the U.S. Cavalry, but poverty, alcoholism, racism, and pipelines. "Broken Hoop" describes their history from the first contact with Europeans until today - their wanderings, their development from horticulture farmers to nomads on horseback, their fight for their land and their way of life, and their dealing with the modern world.
